

Microsoft Word vs. Google Docs

A comprehensive, evidence-backed demonstration document

Positioning thesis

Word provides the real-time collaboration people expect from modern cloud editors while adding deeper professional document production, formal review, rich desktop features, enterprise security, automation, accessibility, and file-format control.

Prepared for	Executive / Sales / IT decision-makers
Prepared by	Microsoft Word capability team
Date	2026-07-03
Document purpose	Prove “all they have plus more” with Word features embedded in this .docx
Status	Draft for review – use Track Changes and comments for sign-off

Table of Contents

Tip: In Word, right-click the Table of Contents and choose “Update Field” to refresh page numbers.

1. Executive summary

Microsoft Word should be positioned as the premium document platform: it matches the cloud collaboration benefits commonly associated with Google Docs, then extends beyond them with mature legal-grade review, long-document production, advanced layout, enterprise-grade protection, automation, accessibility, and integration across Microsoft 365.

- Parity: real-time coauthoring, comments, @mentions, sharing links, version history, autosave, templates, spelling/grammar help, and web access.
- Word advantage: Track Changes controls, compare/combine, mail merge, advanced styles, captions/cross-references, indexes, custom fields, content controls, macros/add-ins, protected documents, sensitivity labels, and richer desktop publishing features.
- Enterprise advantage: integration with SharePoint, OneDrive, Teams, Purview, Copilot, Outlook, Excel, PowerPoint, Power Automate, and Microsoft security/compliance workflows.

Bottom line

Google Docs is excellent for lightweight browser-first collaboration. Word is built for the full lifecycle: brainstorming, drafting, formal review, publication, records retention, compliance, and reuse.

2. Evidence base and source notes

<u>Source</u>	<u>What it supports</u>	<u>Link</u>
<u>Microsoft Support – Track Changes in Word</u>	<u>Word supports Track Changes views, accepting/rejecting changes, author colors, and locking tracking.</u>	<u>Open source</u>
<u>Microsoft Word Blog – secure collaboration in Word</u>	<u>Word collaboration uses OneDrive/SharePoint with coauthoring, comments, track changes, version history, secure sharing, and access levels.</u>	<u>Open source</u>
<u>Microsoft Learn – sensitivity labels</u>	<u>Microsoft Purview sensitivity labels can classify and protect content with encryption, markings, and access restrictions in Office apps.</u>	<u>Open source</u>
<u>Microsoft Learn – Copilot data protection architecture</u>	<u>Microsoft 365 Copilot honors Microsoft 365 access controls, sensitivity labels, and encryption.</u>	<u>Open source</u>
<u>Google Workspace – Google Docs product page</u>	<u>Google Docs provides real-time collaboration, comments, suggestions, @mentions, Smart Compose, spelling/grammar suggestions, translation, Sheets/Meet integrations, add-ons, version history, offline access, security, and encryption.</u>	<u>Open source</u>

3. Capability matrix: Word has all the expected basics plus professional depth

Capability	Google Docs expectation	Microsoft Word answer	Word advantage
Real-time coauthoring	Multiple users edit in a browser	Coauthoring in Word desktop/web when stored in OneDrive/SharePoint	Collaboration with desktop-grade layout and review controls
