Microsoft Word vs. Google Docs

A comprehensive, evidence-backed demonstration document

Cell-level AlternateContent follows:

Choice paragraph inside table cell (Requires=w14)**Positioning thesis**

Word provides the real-time collaboration people expect from modern cloud editors while adding deeper professional document production, formal review, rich desktop features, enterprise security, automation, accessibility, and file format control.

Choice

Prepared for	Executive / Sales / IT decision makers
Prepared by	Microsoft Word capability team
Date	2026-07-03
Document purpose	Prove “all they have plus more” with Word features embedded in this .doex
Status	Draft for review—use Track Changes and comments for sign-off

Table of Contents

Tip: In Word, right-click the Table of Contents and choose “Update Field” to refresh page numbers.

1. Executive summary

Microsoft Word should be positioned as the premium document platform: it matches the cloud collaboration benefits commonly associated with Google Docs, then extends beyond them with mature legal-grade review, long document production, advanced layout, enterprise-grade protection, automation, accessibility, and integration across Microsoft 365.

- Parity: real-time coauthoring, comments, @mentions, sharing links, version history, autosave, templates, spelling/grammar help, and web access.
- Word advantage: Track Changes controls, compare/combine, mail merge, advanced styles, captions/cross references, indexes, custom fields, content controls, macros/add-ins, protected documents, sensitivity labels, and richer desktop publishing features.
- Enterprise advantage: integration with SharePoint, OneDrive, Teams, Purview, Copilot, Outlook, Excel, PowerPoint, Power Automate, and Microsoft security/compliance workflows.

Bottom line

Google Docs is excellent for lightweight browser-first collaboration. Word is built for the full lifecycle: brainstorming, drafting, formal review, publication, records retention, compliance, and reuse.

2. Evidence base and source notes

Source	What it supports	Link
Microsoft Support—Track Changes in Word	Word supports Track Changes views, accepting/rejecting changes, author colors, and locking tracking.	Open source
Microsoft Word Blog—secure collaboration in Word	Word collaboration uses OneDrive/SharePoint with coauthoring, comments, track changes, version history, secure sharing, and access levels.	Open source
Microsoft Learn—sensitivity labels	Microsoft Purview sensitivity labels can classify and protect content with encryption, markings, and access restrictions in Office apps.	Open source
Microsoft Learn—Copilot data protection architecture	Microsoft 365 Copilot honors Microsoft 365 access controls, sensitivity labels, and encryption.	Open source
Google Workspace—Google Docs product page	Google Docs provides real-time collaboration, comments, suggestions, @mentions, Smart Compose, spelling/grammar suggestions, translation, Sheets/Meet integrations, add-ons, version history, offline access, security, and encryption.	Open source
