

Integrating Sources: Guidelines for Teachers and Students

When do I need to integrate sources?

OFTEN, IN ACADEMIC WRITING, YOU READY TO USE ALL-AGE SERVICE

What a wonderful world

MEETING AIM

To discover that God created a wonderful world, and then see that he will complete the good works he started in us.

BIBLE PASSAGE

Genesis 1:1-2:4

BACKGROUND

This service is designed to be used with a congregation in a church building. However, with some adaptation, you should be able to use it on Zoom or other video conferencing software. For those who have been in church for some time, the creation story from Genesis 1 will be very familiar. Yet, those with no church background might find it strange, when compared to the science of creation. Help both of these groups see beyond the words to the creative intentions of God. By exploring the passage, we can discover fundamental things about God, ourselves and the relationship we can have with him.

WELCOME—5 mins

As people join your service, welcome them and ask them about their week. Try to have a mix of ages and backgrounds on your welcome team.

OPENING ACTIVITIES—10 mins

OPTION ONE: Creation sound and vision

You will need: pictures of creation on a PowerPoint presentation; appropriate music and the means to play it

Before the session, create a PowerPoint presentation of some incredible images of the natural world. It's easy to find copyright-free pictures by searching the internet—desktop wallpapers often work really well. Set up your presentation to transition from slide to slide on a timer and loop it. Either add music to the presentation itself or play something as it shows. Something instrumental would work well or 'Praise to the Lord, the Almighty' from the *Passion: Hymns Ancient & Modern* album. You can either have the music and slides rolling as people arrive or roll them for people to engage with after the welcome. Pray, thanking God for the amazing world he's created.

OPTION TWO: Creation art

You will need: art materials; paper; Bibles

As people arrive, have art materials set up for them to draw on ideas and research from other people. This is also known as their favourite part of the creation story. Have Bibles available too, opened at Genesis chapter 1. Have someone collating all the pictures onto your display board—if you can get them put up chronologically, so much the better! The size of space you have to put the pictures up will inform the size of paper to give to each person! As you open the service, draw attention to your wall of creation and thank God for all he's made.

BIBLE STORY—10 mins

You will need: Bibles or printouts of Genesis 1:1-2:4 or the passage displayed on screen (or all three); pieces of air-drying clay in freezer bags or small food storage boxes

Make sure everyone can see a Bible, a copy of the passage or the passage displayed on screen. Ask everyone to gather into smaller groups (ensure the all the groups have a mixture of ages) and come up with an action to signify what happened on each day of creation. They can be as creative as they'd like! If you feel it would be simpler, you could put up a slide with the bullet points of what was created on which day.

After five minutes or so, ask someone to read through the whole passage. As they do, encourage everyone to do their actions as for each day. Draw attention to the fact that God looks at what he's made and declares it to be good.

Now give everyone (or each group) a piece of air-drying clay. Ask everyone to make a person. After five minutes, say that you're all going to breathe life into your people. Encourage everyone to try! Why isn't it working? Because only God can give life! Explain that Genesis 2 describes God creating a man out of the earth and then breathing life into him. Read out Genesis 2:7. And, back in Genesis 1, when he looked at human beings, he didn't just say it was good, he said it was *very* good! We look at the splendour of creation and are amazed but God sees us as the pinnacle or high point of his creation, with a special part to play. We are designed to look after all that has been created and to have a special friendship with God as we do that.

SMALL GROUPS—10 mins

You will need: copies of the questions below; Bibles

Encourage people to discuss these questions in smaller groups. Give each group a copy of these questions:

- What do you find most incredible about creation?
- What's the most amazing natural phenomenon that you have seen?
- Are you challenged to think about your own role in looking after the world?
- What do you think about the fact that the thing God was most pleased about in creation was people (that includes you)?
- How can we enjoy all that God has made—including ourselves?
- On the seventh day, God rested, not because he was tired but because he was satisfied with his work. What does that tell us about rest?

Give the groups time to chat about these questions, referring to the Bible passage if they need to.

REVIEW—5 mins

You will need: roving mic (if needed)

Get some feedback on the questions from 'Small groups', using secondary sources. a microphone to hear people's contributions if your meeting space is large.

It is necessary to show that these ideas and research come from another source. In order to do this, different skills are used, including:

- paraphrasing
- summarising
- quoting
- referencing

All of these skills involve ways of integrating sources so that the flow of the writing is maintained and the transition between ideas is smooth. For further information on paraphrasing, summarising, quoting and referencing, refer to the *Academic Skills Development* page on the SACE website.

Integrating sources

There are two common ways to integrate sources. The information can be presented in an *author-prominent* or *information-prominent* manner.

	Information-prominent	Author-prominent
--	-----------------------	------------------

Emphasis	Information / findings / ideas	Author / author's expertise
In-text reference	Author only referred to in parenthesis () or footnote.	Author's name + reporting verb is clearly stated together with the information.
Example	Research is an important part of many assessment types (SACE Board of SA 2009, p. 1).	The SACE Board of SA (2009, p. 1) states that research is an important part of many assessment types.

Author-prominent referencing

An important element of this type of referencing is the choice of reporting verb. In assignments, these types of verbs can demonstrate understanding, analysis and evaluation. In well-developed, academic writing, the choice of reporting verb can:

- identify the viewpoint of the source
- identify the writer's viewpoint about the information presented by the source
- evaluate the information presented.

Reporting verbs – strength and function

Reporting verbs can be weak, neutral or strong. They can also be categorised in terms of meaning or function, such as *agreement* or *emphasis*. Being aware of the strength of these verbs and the different functions will help you choose the most appropriate one to use.

Consider the following statements and the difference in meaning because of the change of reporting verb. *Note* is a weaker reporting verb, suggesting that the authors did not pay much attention to the topic. *State* is neutral, while *emphasise* is quite strong, suggesting that the authors have a definite opinion on this topic.

Norton *et al.* note that maintaining safety is of utmost concern when children are playing sport (Norton *et al.* 2001, p. 14).

Norton *et al.* state that maintaining safety is of utmost concern when children are playing sport (Norton *et al.* 2001, p. 14).

Norton *et al.* emphasise that maintaining safety is of utmost concern when children are playing sport (Norton *et al.* 2001, p. 14).

Below is a categorized list of some of the most common reporting verbs.

	weak	neutral	strong
addition		add	
agreement	concede, observe	acknowledge, agree, confirm, concur	support, assure, advocate
disagreement	question, doubt	disagree,	reject, refute, deny, dismiss, challenge, dispute
emphasis			emphasise, highlight, stress, assert
persuasion	guess	justify, interpret, find	assert, argue, contend, insist, prove, confirm, establish, persuade, emphasise, urge
evaluation	consider,	analyse, evaluate,	warn, blame, judge
