[Superscript Demo](#)

[Demonstrating superscript formatting.](#)

E=mc² and x³ are common superscript examples.[The Pot-Pourri Compendium](#)

A Sampler Document for Extraction Testing

This document is intentionally varied. It mixes headings, body copy, inline formatting, colors, lists, a table, footnotes, a hyperlink, and a block quote so an extraction tool has plenty to chew on. **Emphasis lives here.** See note.^[1]

Commented [AS1]: Testing.

1. Typography Samples

Below are inline runs with mixed formatting. Each run is a separate span so an extractor can detect boundaries:

Bold blue, italic red, underlined green, yellow-highlighted, strikethrough, monospace.

2. Lists

2.1 Bulleted

- Apples — a pomaceous fruit
- Bourbon — distilled in Kentucky
- Cardamom — a fragrant spice

2.2 Numbered (with nested)

- Preheat the oven to 375°F.
- Whisk dry ingredients.
- Sift the flour twice.
- Add a pinch of salt.
- Bake for 22 minutes.

3. Tabular Data

A small table with a header row:

Region	Q1	Q2	Q3
North	\$120k	\$135k	\$150k

South	\$98k	\$110k	\$128k
East	\$143k	\$151k	\$162k
West	\$87k	\$92k	\$104k

4. Quote & Link

“Not all those who wander are lost.”¹—a line often quoted to test block-quote handling.

More information available at our [reference page](#).

This sentence carries a second footnote for testing multi-note extraction. ²

5. Color Callouts

WARNING: Do not feed the extraction tool after midnight.

INFO: Tables, lists, and footnotes should each round-trip cleanly.

—end of sample—
