

DATA CAPABILITY STATEMENT v2.0

ADISA Data Capability Statement This table shows the Data Sanitisation Capabilities of the service provider being audited. These capabilities have been verified as being able to be delivered by the service provider themselves. This does not make these services approved as each customer should specific their preferred data sanitisation process after a risk assessment process.

On client site		Media Type	At processing facility	
Reuse	Destruction		Reuse	Destruction
Here you would add what software tool , version number of the product used to sanitise the assets on client site	Here you would add what method used to destroy the assets the assets on client site eg. Shred to 6mm	Magnetic Hard Disk Drives	Here you would add what software tool, version number of the product used to sanitise the assets at your facility	Here you would add what method used to destroy the assets at your facility eg. Shred to 6mm
		Solid State Hard Drives		
		Smart Phones
