**Requirement Number and Definition**

**Identify the customized control name / identifier** for each control used to meet the Customized Approach Objective.  
(*Note: use the Customized Control name from the assessed entity's controls matrix*)

—

**Describe each** control used to meet the Customized Approach Objective.  
(*Note: Refer to the Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures for the Customized Approach Objective*)

—

**Describe how** the control(s) meet the Customized Approach Objective.

—

**Identify the Controls Matrix documentation** reviewed that supports a customized approach for this requirement.

—

**Identify the Targeted Risk Analysis documentation** reviewed that supports the customized approach for this requirement.

—

**Identify** name(s) of the assessor(s) who attests that:

- The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in *PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website*, and the results of the Controls Matrix support the customized approach for this requirement.
- The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in *PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website*, and that the results of the Risk Analysis support use of the customized approach for this requirement.

—

**Requirement Number and Definition**

**Describe** the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

***Note 1:** Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

***Note 2:** Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

***Note:** all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.

—

**Describe** the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.

—

**Document** the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

***Note 1:** Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

***Note 2:** Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

***Note:** all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.
