### Explanatory Statement

#### 1.——Authority

~~Section 13 of the *Food Standards Australia New Zealand Act 1991* (the FSANZ Act) provides that the functions of Food Standards Australia New Zealand (the Authority) include the development of standards and variations of standards for inclusion in the *Australia New Zealand Food Standards Code* (the existing Code).~~

~~Division 2 of Part 3 of the FSANZ Act specifies that the Authority may prepare a proposal for the development or variation of food regulatory measures, including standards. This Division also stipulates the procedure for considering a proposal for the development or variation of food regulatory measures.~~

~~FSANZ has published a revision of the existing Code (the P1025 Code). The P1025 Code will replace the existing Code on 1 March 2016, when the existing Code will be repealed.~~

~~FSANZ prepared Proposal P1036 to amend the P1025 Code to incorporate variations to the existing Code arising from A1092, A1096, P1022 and P1029 (subject to their publication) and to correct minor errors in the published P1025 Code. The Authority has considered the Proposal in accordance with Division 2 of Part 3 and has approved a draft variation.~~

~~Following consideration by the Australia and New Zealand Ministerial Forum on Food Regulation<sup>†</sup>, section 92 of the FSANZ Act stipulates that the Authority must publish a notice about the standard or draft variation of a standard.~~

~~Section 94 of the FSANZ Act specifies that a standard, or a variation of a standard, in relation to which a notice is published under section 92 is a legislative instrument, but is not subject to parliamentary disallowance or sunseting under the *Legislative Instruments Act 2003*.~~

#### 2.——Purpose

---

---

<sup>†</sup> ~~convening as the Australia and New Zealand Food Regulation Ministerial Council~~

The Authority has approved the draft variation to incorporate, into the P1025 Code, variations made to the existing Code that were previously approved by the Board in A1092, A1096, P1022 and P1029 and which have since been published; and to correct the following errors:

- minor typographical errors
- errors made in the previous incorporation, into the P1025 Code, of variations to the existing Code arising from Applications and Proposals other than those mentioned above.

### **3. Documents incorporated by reference**

The variation to the P1025 Code does not incorporate any documents by reference not already incorporated into the existing Code.

### **4. Consultation**

In accordance with the procedure in Division 2 of Part 3 of the FSANZ Act, the Authority's consideration of P1036 included one round of consultation with appropriate government agencies following an assessment and the preparation of a draft variation and associated report.

~~Because the amendments affect a wide range of FSANZ's stakeholders, the call for submissions was also notified in FSANZ's Notification Circular to ensure all stakeholders were included in the call for submissions.~~

~~A Regulation Impact Statement was not required because the proposed variation to the P1025 Code is likely to have a minor impact on business and individuals. Proposal P1036 is considered to be an extension of the permission for the original code reform proposal P1025 (OBPR reference 14493).~~

## ~~5.—Statement of compatibility with human rights~~

~~This instrument is exempt from the requirements for a statement of compatibility with human rights as it is a non-disallowable instrument under section 94 of the FSANZ Act.~~

## **[111] After Schedule 8**

### **Schedule 9 CPL(H) training for paragraph 61.615 (1B) (b) (non-integrated training courses)**

- 1 For paragraph 61.615 (1B) (b), the minimum requirements for an applicant for the CPL(H) who has not completed an integrated training course are as follows:
  - (a) at least 105 hours of flight training must be completed in no more than 2 types or models of helicopter;
  - (b) for paragraph (a):
    - (i) the first 15 hours must be completed in 1 of the types or models of helicopter mentioned in paragraph (a);
    - (ii) at least 20 hours must be completed in each type or model of helicopter mentioned in paragraph (a);
    - (iii) at least 40 hours must be completed as dual flight training in any of the types or models of helicopter mentioned in paragraph (a);
    - (iv) at least 25 hours must be completed as pilot in command (but not as cross-country flight time) in any of the types or models of helicopter mentioned in paragraph (a);
    - (v) the final 30 hours of flight training actually undertaken must be completed within the 3 months immediately before the flight test.

*Note* Additional flight training may be undertaken, including tethered helicopter flight training and flight training in additional types of helicopter.

- 2 Subject to clause 3, for paragraph 1 (a), a type or model of a helicopter means the single-engine helicopter, or 1 of the single-engine helicopters, mentioned by name in a single cell of column 2 of Schedule 14 of the *Prescription of aircraft and ratings — CASR Part 61 Instrument*, of the Edition that is in force at the time of the particular flight training (the **relevant Prescription instrument**).

*Note 1* The *Prescription of aircraft and ratings — CASR Part 61 (Edition 5) Instrument 2018* is the Edition of the prescription instrument that is in force immediately before the end of 31 August 2018. It is a legislative instrument, freely available on the Federal Register of Legislation. If and when a prescription instrument is superseded by a later edition, the earlier edition remains freely available on the Federal Register of Legislation.

*Note 2* Although, for Schedule 14 of the relevant Prescription instrument, more than 1 type or model of helicopter in a single cell of column 2 may attract the same type rating on a pilot licence, each type or model of helicopter mentioned in a single cell of column 2 is to be considered a different type or model of helicopter for clause 1.

- 3 Despite subsection 2, the 2 helicopter types or models mentioned in the first cell of column 2 of ~~in subsection S29—10(3) to correct typographical errors relating to units of measurement. The word, ‘PANEL’ is also removed from the table heading~~ Schedule 14 of the relevant Prescription instrument for the Sikorsky Aircraft Corp may be treated interchangeably as a single type or model.

*Note* These are the Hughes 269 (all piston engine models) and the Schweizer 300 (all piston engine models).
