

Requirement Number and Definition

Identify the customized control name / identifier for each control used to meet the Customized Approach Objective. <i>(Note: use the Customized Control name from the assessed entity's controls matrix)</i>		—
Describe each control used to meet the Customized Approach Objective. <i>(Note: Refer to the Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures for the Customized Approach Objective)</i>		—
Describe how the control(s) meet the Customized Approach Objective:		—
Identify the Controls Matrix documentation reviewed that supports a customized approach for this requirement.		—
Identify the Targeted Risk Analysis documentation reviewed that supports the customized approach for this requirement.		—
Identify name(s) of the assessor(s) who attests that: — The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and the results of the Controls Matrix support the customized approach for this requirement. — The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and that the results of the Risk Analysis support use of the customized approach for this requirement.		—
1 Describe the testing procedures derived and performed by the assessor to validate that the implemented controls meet the Customized Approach Objective ; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach. <i>Note 1: Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.</i> Note 2: Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.		2
3 Enter assessor-derived testing procedure here:	4 Identify what was tested (for example, individuals interviewed; system components reviewed; processes observed, etc.) <i>Note: all items tested must be uniquely identified.</i>	5—
6—		
	Identify all evidence examined for this testing procedure:	—
	Describe the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective:	—

Requirement Number and Definition

Document the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

Note 1: *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

Note 2: *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

Identify what was tested (for example, individuals interviewed; system components reviewed; processes observed, etc.)

Note: *all items tested must be uniquely identified.*

—

Identify all evidence examined for this testing procedure:

—

Describe the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls are maintained to ensure ongoing effectiveness:

—
