2. ~~What career opportunities have I identified? Do most science graduates work in labs?~~

_____ Wh

at sources can I utilise to identify career opportunities and job/study vacancies?

_____ Ho

w important are postgraduate qualifications for career progression?

_____ Is

personal development as important as academic achievements for employers?

_____ Ha

ve I considered working/studying outside the UK?

_____ In

the next 6 months, how will I improve my "employability" for next career endeavour?

B) APPLICATION

1. ~~Will I apply for jobs while studying/working in my current role? How long do I expect it to take me to find a job?~~

_____ Wh

at do I consider the most important elements within a job application?

_____ Wh

at does an employer seek in a CV? Whom will I ask to review?

_____ Wh

at is an employer looking for in a cover letter? Whom will I ask to review?

_____Should I apply for jobs for which I do not meet all requirements?

_____Do I apply to labs/companies that do not have positions advertised?

C) PROGRESSION

1. I do not know anyone in lab/company X. Is contact by LinkedIn the best approach?

_____How should I prepare for interviews (skype, group, one-to-one or phone)?

_____Are aptitude or exam based assessments the 'norm'? How can I prepare for these?

2. Should I follow up with labs/companies which have not responded to my application?

_____Should I take on a position which is not ideal for me while waiting for my dream job?

_____Am I happy with the career advancement opportunities available to me?

_____What is most important to you in a job: people, money, tasks, environment or benefits?

_____Am I optimistic about my career opportunities? Why?

_____What are the 3 most significant career action plans that you will implement in the next 6 months?
