

Requirement Number and Definition

<u>Identify the customized control name / identifier for each control used to meet the Customized Approach Objective.</u> <i><u>(Note: use the Customized Control name from the assessed entity's controls matrix)</u></i>	—
<u>Describe each control used to meet the Customized Approach Objective.</u> <i><u>(Note: Refer to the Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures for the Customized Approach Objective)</u></i>	—
<u>Describe how the control(s) meet the Customized Approach Objective.</u>	—
<u>Identify the Controls Matrix documentation reviewed that supports a customized approach for this requirement.</u>	—
<u>Identify the Targeted Risk Analysis documentation reviewed that supports the customized approach for this requirement.</u>	—
<u>Identify name(s) of the assessor(s) who attests that:</u> • <u>The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and the results of the Controls Matrix support the customized approach for this requirement.</u> • <u>The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and that the results of the Risk Analysis support use of the customized approach for this requirement.</u>	—

Requirement Number and Definition

Describe the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

Note 1: *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

Note 2: *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

<u>Enter assessor-derived testing procedure here:</u> 	<u>Identify</u> what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.) <u>Note:</u> all items tested must be uniquely identified.	—
	<u>Identify</u> all evidence examined for this testing procedure.	—
	<u>Describe</u> the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.	—
<u>Document</u> the testing procedures derived and performed by the assessor to validate <u>the controls are maintained to ensure ongoing effectiveness</u>; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken. <u>Note 1:</u> <i>Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.</i> <u>Note 2:</u> <i>Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.</i>		
<u>Enter assessor-derived testing procedure here:</u> 	<u>Identify</u> what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.) <u>Note:</u> all items tested must be uniquely identified.	—
	<u>Identify</u> all evidence examined for this testing procedure.	—

Requirement Number and Definition

	<u>Describe</u> the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls are maintained to ensure ongoing effectiveness.	—
