

OOXML w:highlightcolor tester – enumerates ST HighlightColordirect values, (hex/auto/theme), rStyle-only highlights, inline overrides, and linked styles with theme tint/shade examples.

A) Direct <w:highlight> values <w:color> variants on runs:

- w:highlight w:val='yellow': Highlightcolor hex FF0000 (red): Color sample text
- w:highlight w:val='green': Highlightcolor hex 00AA00 (green): Color sample text
- w:highlight w:val='cyan': Highlightcolor hex 0000FF (blue): Color sample text
- w:highlight w:val='magenta': Highlightcolor auto: Color sample text
- w:highlight w:val='blue': Highlightcolor theme accent1: Color sample text
- w:highlight w:val='red': Highlightcolor theme accent2: Color sample text
- w:highlight w:val='darkYellow': Highlightcolor theme accent3: Color sample text
- w:highlight w:val='darkGreen': Highlightcolor theme accent4: Color sample text
- w:highlight w:val='darkCyan': Highlightcolor theme accent5: Color sample text
- w:highlight w:val='darkMagenta': Highlightcolor theme accent6: Color sample text
- w:highlight w:val='darkBlue': Highlightcolor theme hyperlink: Color sample text
- w:highlight w:val='darkRed': Highlightcolor theme followedHyperlink: Color sample text
- w:highlight w:val='darkGray': Highlightcolor theme accent1 + tint 99: Color sample text
- w:highlight w:val='lightGray': Highlightcolor theme accent1 + shade 33: Color sample text
- w:highlight w:val='black': Highlight sample
- w:highlight w:val='white': Highlight sample
- w:highlight w:val='none': Highlight sample

B) rStyle-only (character style sets highlight):color (no inline <w:color>):

- rStyle='SD_HighlightYellowChar':ColorRedChar' (red): Styled yellow highlightred text
- rStyle='SD_HighlightLightGrayChar':ColorAccent2Char' (theme accent2): Styled lightGray highlighttheme accent2 text
- rStyle='SD_HighlightNoneChar':ColorAutoChar' (auto): Styled none (no highlight)auto-color text

C) rStyle + inline <w:highlightcolor> (inline overrides style):

- rStyle='SD_HighlightYellowChar'ColorAccent2Char' + inline 'none'hex FF0000 => expect no highlight: Yellowred: Accent2 style overridden to noneby inline red

- rStyle='SD_HighlightNoneChar'ColorRedChar' + inline 'darkBlue'auto => expect darkBlue: Noneauto color: Red style overridden to darkBlueby inline auto

D) Linked style pair (paragraph+character) with highlighttheme colors:

- rStyle='SD_LinkedHighlightHeadingChar' => yellowLinkedColorHeadingChar' => magenta:
Linked Char style applied

→ rStyle='SD_LinkedColorHeadingChar' + inline theme accent1 => expect accent1: Inline theme overrides char style color

- pStyle='SD_LinkedHighlightHeading' (lightGrayLinkedColorHeading' (accent1) + inline 'red'hex 0000FF on a run: This part should be red highlightblue (0000FF) overriding paragraph theme

Table examples (mixed highlightcolor sources):

rStyle=YellowAccent2

Yellow cellTheme accent2

rStyle=NoneRed + inline darkMagentaauto

DarkMagenta cellShould be auto color
