SUNY Broome General Education
Course Revision Form (For Current Gen Ed Courses)

~~SUNY Broome General Education Course Assessment Map & Plan~~
~~SUNY Broome GE Course SLO Alignment with SUNY-GER Course Alignment/SUNY Broome~~
~~ILOs~~

~~Course Title~~ and Mass Communications seeks applications for a tenure-track assistant professor position in public relations. ~~Number: Please list the course number and advertising who would like to join us~~ title here: ANT-113: Introduction to Biological Anthropology

~~Course Modalities:~~ Please list the modalities, which the course is offered (in class, online, blended, Fast Forward). Please note, you are expected to assess across all modalities in which your course was offered at Kansas the time of assessment during your assessment schedule. *On-campus, online, and blended.*

~~SUNY-GER Category:~~ Please list the SUNY-GER category here by number (see below): ***Natural Sciences (and scientific reasoning)***

SUNY GER Learning Outcomes: Please list the outcomes from the knowledge area to be covered here (please review Guidelines for the approval of State University Gen Ed Requirement Courses). Each outcome within the knowledge area proposed must be included and mapped to SUNY-GER learning outcomes.

Responsibilities:

1. Teach a variety of undergraduate skills-based and theoretical courses in public relations and advertising appropriate to the needs of the A.Q. Miller School and the candidate's interest area
2. Record of, or potential for, original research in public relations, advertising, communications, or relevant area
3. Teach research, theory, and topics courses in our graduate program
4. Willingness to advise undergraduate students
5. Willingness to advise graduate students and serve on thesis committees
6. Engage in school, university and community service, as well as a program of service and outreach involving media professionals and media organizations

Required qualifications:

1. An earned doctorate in mass communication, communication, or related field. ABD applicants, with an effective research record, teaching experience, and the expectation of completion of doctoral degree by August 2015, will be considered.
2. Prior experience teaching courses in public relations, advertising, or mass communications
 - Please see the following links for information regarding:

~~SUNY Broome General Education
Course Revision Form (For Current Gen Ed Courses)~~

- a. Our JMC program <http://jmc.ksu.edu/>
 - b. The JMC public relations sequence <http://jmc.ksu.edu/current/public-relations.html>
 - c. The JMC advertising sequence <http://jmc.ksu.edu/current/advertising.html>
 - d. The JMC graduate program <http://jmc.ksu.edu/graduate/>
3. Evidence of a programmatic line of research and/or creative work

Preferred Qualifications:

- 1. Professional experience in public relations, advertising, marketing or areas related to mass communications
- 2. Evidence of a willingness to procure outside funding for research activities
- 3. Indication of a desire to advise student organizations such as PRSSA, AdClub, and the JMC program's TakeFlight student-run agency
- 4. Evidence of engagement in current industry issues
- 5. Evidence of engagement in networking and community outreach activities
- 6. Evidence of a strong commitment to equity and an ability to work effectively with diverse populations.

Review of applications begins Feb. 15, 2015, until the position is filled.

The appointment begins in August 2015.

Send resume; a statement outlining teaching philosophy and professional goals; names and contact information for three references; and any additional materials, including online links, that are related to teaching and professional productivity.

Applications and other materials can be submitted to jmcjobs@k-state.edu (PDF files preferred) or mailed to:

The Miller School: The program, which began in 1910, is one of the oldest programs of its type in the nation. The school has 625 students in three sequences — Journalism and Digital Media, Public Relations and Advertising — and 35 students in a master's degree program. Award-winning student-operated media outlets on campus include The Collegian, the ninth-largest daily newspaper in the state; KSDB-FM, the state's longest-running FM radio station; and KKSU-LP TV, a low-power television station serving the Manhattan community. The School's students also produce an annual magazine for alumni and friends of the School and operate the PR agency, Take Flight. The School is accredited by The Accrediting Council on Education in Journalism and Mass Communications.

See the Miller School's website at jmc.ksu.edu for more information.

Kansas State University: The university was founded in 1863 as one of the first land-grant universities. K-State is located in Manhattan, Kansas, about 120 miles west of Kansas City. The student population totals nearly 25,000. K-State is the first in the nation among state-supported schools in Rhodes, Truman, Marshall and Goldwater scholarships. The university's athletic teams compete in the Big 12 Conference.

See the Kansas State University website at www.ksu.edu for more information.

Manhattan: The city has a permanent population of more than 56,000. Manhattan is the county seat for Riley County and the retail center for a three-county region. Manhattan will be the site of the new federal National Bio and Agro-Defense Facility, a state-of-the-art biocontainment facility for the study of foreign animal, emerging and zoonotic diseases that threaten the U.S. animal agriculture and public health. Manhattan is in the middle of the scenic Flint Hills of north central Kansas. The city boasts a remarkably high quality of life, including a variety of arts programs, an abundance of parks, many sports and recreation facilities, shopping opportunities and the KSU-focused Aggieville business district. The public school system is considered one of the best in a state that puts a premium on public education. The cost of living is considered very reasonable.

See websites at www.manhattan.org and at www.themercury.com/Community for more information.

1/6/2015

~~Students will demonstrate scientific reasoning applied to the natural world, including~~

- ~~1. an understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of data analysis or mathematical modeling; and~~
- ~~2. application of scientific data, concepts, and models in one of the natural sciences.~~

~~**Assessment Schedule:** Please list the assessment schedule here, including semester and year it will occur; if assessment is done each semester, please indicate this. **HPSS courses are assessed on a three-year cycle.**~~

~~**Which SUNY Broome ILO category do you believe your course maps to, if any?** _Scientific & Quantitative Reasoning_____~~

**SUNY Broome General Education
Course Revision Form (For Current Gen Ed Courses)**

SUNY Broome Course SLO (every course SLO should be listed, as stated within the college catalogue & course syllabus)	SUNY-GER SLO (indicate which GER SLO is met; if none, write N/A)	Assessment Timeline (indicate the frequency in which assessment occurs, including semester and year within assessment cycle) *All SLOs must be assessed at least once every 3 years	Learning Activity (indicate the learning activity used to assess the SLO)
Apply methods used by biological anthropologists to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence and employment of data analysis or mathematical modeling.	Natural Sciences (scientific reasoning): #1—An understanding of the methods scientists use to explore natural phenomena, including observation, hypothesis development, measurement and data collection, experimentation, evaluation of evidence, and employment of data analysis or mathematical modeling.	Every three years.	Objective test and written assignments
Construct scientific data, concepts, and models in biological anthropology.	Natural Sciences (scientific reasoning): #2—Application of scientific data, concepts, and models in one of the natural sciences.	Every three years.	Objective test and written assignments

Course Description:

An introduction to biological anthropology with an emphasis on the interaction of biology and culture to explain human evolution and modern biological variation. An exploration of human evolutionary history from evidence grounded in paleoanthropology, genetics, archaeology, and primatology. Students examine evidence and practice the scientific method for data collection, analysis, and interpretation in weekly laboratory exercises.

Topics:

Scientific Method/Hypothesis Testing/Data Collection
Taxonomic Systems/Non-human Primates
Evolution/Mutation/Genetics
Fossil Evidence/Ecology
Speciation
Environmental Change/Biological Adaptation
Medical Anthropology/Forensic Studies
