“Keeping School Cool: Reducing Aggressive Behaviors”: Academy
(Elementary 4-6)
Understanding Aggressive Behaviors Lesson Plan
Obtain Administrator Approval Prior to Implementing Lesson

Objectives: Students will...

- Team build with an icebreaker activity
- Learn about aggressive behaviors and their consequences
- Practice strategies to calm aggressive behaviors

Materials:

- ✓ Colored Cards: cut apart-1 card per student (slide 1; also see black and white option Slide 3)
- ✓ Color Card Key-posted or displayed (slide 2; also see black and white option slide 4)
- ✓ Large paper and markers for each group
- ✓ “Uncool” Matching Handout-1 per group (see below lesson pg. 4)

Team Teaching: For effective implementation of Law Related Education (LRE), team teach with the classroom teacher by...

- Having both the officer and teacher rotate to different groups. Both instructors will provide positive feedback and engage in friendly conversations with students. This procedure will help reduce classroom disruptions, increase student engagement and build supportive relationships with students.
- Encouraging classroom teachers to participate in all activities by injecting clarification statements and relating any relevant content to their curriculum. In this method, students will see more connections to their student life and be willing to carry over concepts and skills learned in LRE.
- Assigning the classroom teacher part of the lesson instructions. Team teaching with the classroom teacher enables the students to further see the importance of LRE lessons. It also provides opportunity for the classroom teacher to demonstrate teaching skills conducive for effective teaching. Student attention can be maintained easier with different voices and personalities experienced throughout the lesson.

Timeframe: 40 Minutes

Activity 1: Icebreaker and Group Sorter

1. Hand each student a different colored card. Instruct the students to move around the room and exchange their card with a peer then continue moving on to the next peer, exchanging cards again.
2. Allow students time to exchange their cards several times before you call time. Instruct the students to form groups of 4 with students that have a different colored card. The students should then sit together in their new group. Any students who did not find a group should be placed in a group or create a new group.
3. Post the Color Card Key and explain that the statements help students examine behaviors at school that keep the environment calm. If students let emotions take over, it can cause behaviors that make the learning environment feel unsafe.
4. Instruct the students within each small group that have the red number 1 card, to read the statement displayed, aloud to their group, then finish the statement with their own answer. The other members of the group can also give their ending to the red card statement. Each group will repeat the process with yellow, green then blue statements.
5. Rotate to each group, listening to what is being shared, providing any necessary feedback.
6. Next, call out each colored statement and ask the group member from each group with that colored card to share one response from their group, aloud to the class. It could possibly be a response that most members of the group shared in common or is different than other groups reporting.

Statements: (any school appropriate answer is acceptable)

Red: I think school can be fun when... (Ex. Everyone gets along, there is no homework, we have assemblies, etc.)

Yellow: I think school can be uncool when... (Ex. There is too much work, students fight, it's hot, etc.)

Green: I think students stay calm when they... (Ex. Think before they respond, treat each other nicely, accept each other, etc.)

Blue: I think students lose their cool when they... (Ex. Let others push their buttons, get frustrated, feel left out, etc.)

Activity 2: Small Group Work

1. Provide the groups with a large poster paper and markers.
2. Supply each group with one copy of the "Uncool" Matching Handout and instruct the groups to review the handout and draw a line to match the term with the description. (optional: assign the group member with the yellow card)
3. Circulate among the groups, checking for accuracy. Call out each term and ask a different volunteer from each group to provide the description. (optional: assign the group member with the green card first then rotate to the next color for the next

definition)

Anger – This emotion can make you feel hot or look red in the face. You may breathe faster or feel a stomach ache. This emotion can make you feel like clenching your fists or yelling. You may react to this emotion in a positive way by standing up for yourself. If you don't control this emotion and take it out on others, you can make things worse.

Aggression – This behavior can have violent actions and is meant to harm others and make them feel unsafe. Others may not want to be around that person. School has rules against acting out with this emotion. There are laws that protect people from being harmed by others expressing this emotion.

Physical Aggression – This behavior causes harm or threatens to cause harm to someone's person or things. It is against school rules and is also against the law. Hitting, kicking, biting and breaking things are some examples of this behavior. If you see someone with this behavior, you should stay away and get help.

Verbal Aggression – This behavior uses mean words or gestures to make others upset or feel bad about themselves. It hurts your relationship with others. Some forms include name-calling, insults, put-downs, threats and making fun of someone with jokes or mean comments. If someone uses this form of communication with you, respond with positive words and let them know you do not like it. If it continues walk away and tell an adult.

4. Next, demonstrate how to divide the poster paper into 4 quadrants and label each quadrant with the following headings. *(optional: assign the group member with the blue card)*

Q1 Aggression looks like... *(Ex. things being thrown, pushing or shoving, screaming, etc.)*

Q2 Aggression feels like... *(Ex. hurt our body or your feelings, scary, etc.)*

Q3 Aggression sounds like... *(Ex. loud voice, mean, hurtful, etc.)*

Q4 Aggression can lead to... *(Ex. time-out, no friends, parents called, go to the office, etc.)*

5. Next, instruct the groups to collaborate and take turns recording responses for each of the quadrants. Groups should try to list at least 2 ideas for each heading.
6. Call out Q1 and ask each group to share one idea from their list. *(optional: assign the group member with the red card first then rotate to the next color for the next question)* Continue with the following quadrants. Elaborate with additional responses if necessary, pointing out violations of school rules (see school handbook) and legal consequences.

Laws:

ARS 13-2911: **"Interference or disruption"** to an educational institution.

ARS 13-1203: An **assault** is committed any time a person knowingly causes physical injury to another person. It is also any time that someone may feel physically threatened or when someone touches someone else to provoke or insult them.

ARS 13-1202: **Threatening or intimidating**; A person commits threatening or intimidating if the person threatens or intimidates by word or conduct; To cause physical injury to another person or serious damage to the property of another;

Activity 3: Problem Solve

1. Now, instruct each student to find a blank space on their group's poster paper and illustrate their own emotion face showing how someone may feel if they see others displaying or expressing aggressive behaviors. Students may also write a feeling word near their emotion face. Display or brainstorm with class possible feeling words. (Ex. *scared, uncertain, confused, etc.*)
2. Circulate around to each group, commenting on the illustrations and asking the student to explain their face.
3. Next, instruct the groups to discuss ways they can calm themselves and keep their cool when their anger is rising. Circulate among the groups, listening for their responses and sharing ideas. (Ex. *count to 10, take deep breaths, rip scrap paper, write, listen to music, talk to someone, draw, dance, squish clay, blow bubbles, stretch, sports, exercise, hug yourself, etc.*)
4. Rotate to each group, several times, asking for one idea each time from group volunteers. Record each different idea on the board and lead the class in practicing the idea. If the student who provided the response feels comfortable allow him/her to lead the class.

Debrief:

1. Write or display the following statements on the board and instruct each group to collaborate to complete the statement and be ready to report out.
2. Rotate to each group and ask a volunteer to read the statement with their group's response.

"One way to keep school cool is to..."

Understanding Aggressive Behaviors

“Uncool” Matching Handout

Anger

Hitting, kicking, biting and breaking things are some examples of this behavior. If you see someone with this behavior, you should stay away and get help.

Aggression

Name-calling, insults, put-downs, threats and making fun of someone with jokes or mean comments are some examples of this behavior. Stay calm, respond with positive words and let them know you do not like it. If it continues walk away and tell an adult.

Physical Aggression

It has been known that there are 80% of all accidents was caused by human error.

if error were the big number use of the late f. That factors at all problem when arrange the shipping operation. With be able to decrease the technical error. But, however, with those modern technology, the management system which arrange people to act and to motivate to fulfill the instruction, is become a big problem. People behavior who work in system or ect and prev

This behavior can have violent actions and is meant to harm others and make them feel unsafe.

Verbal Aggression

This emotion can make you feel hot or look red in the face. You may breathe faster or feel a stomach ache. You may feel like clenching your fists or yelling.

operation, depend on the company policy, procedure and work instruction. Because of all that matter, we need a management system which make a good and tight cooperation in shipping operation between land management and sea management for exceeding shipping accident etc. Management system must BE supported by a skillful human resources and a good supporting implementation. Based on this, in 1993 the IMO has published a new regulation known by ISM Code (International Safety Management Code) to standardize safe management and operation of ship for pollution prevention. Later, it also has become the Chapter IX in SOLAS-1974

Keywords: shipping, management, work instruction, sea management, resources.

Pendahuluan

Dalam situasi persaingan yang semakin ketat, suatu perusahaan dituntut untuk mengelola sumber daya manusia yang dimilikinya dengan baik. Salah satu hasil dari kemampuan mengelola sumber daya tersebut akan tampak dari laba yang terus meningkat untuk dipakai mengembangkan usahanya.

Untuk mencapai tujuan tersebut, pihak manajemen dituntut dapat bekerja lebih efisien dan efektif serta menggunakan sumber dayanya secara optimal. Setiap perusahaan tentunya memiliki sistem manajemen dalam melakukan kegiatannya begitu pula perusahaan pelayaran. Sistem manajemen dalam bidang perkapalan terdiri atas kebijakan perusahaan, petunjuk operasi, pembagian tugas, manual dan prosedur mengoperasikan, memelihara kapal dan menghadapi keadaan darurat seperti kecelakaan atau pencemaran. Meskipun perusahaan kapal sudah memiliki sistem manajemen, perusahaan perlu menilai kembali sistem tersebut. Penilaian kembali itu penting sebagai dasar untuk merencanakan sistem manajemen keselamatan seperti yang diisyaratkan oleh ISM Code.

Hasil dan Pembahasan

Sistem manajemen keselamatan tersebut harus dilaksanakan dengan baik agar perusahaan dapat meningkatkan keselamatan kapalnya. Komitmen penuh dari pimpinan perusahaan dari yang paling atas (manajemen puncak) sampai ke semua lapisan berperan dalam pencapaian sistem manajemen keselamatan, karena tanpa adanya komitmen tersebut usaha yang dilakukan akan sia-sia dan keselamatan Code menjamin perlindungan lingkungan. Penerapan ISM Code menuntut komitmen manajemen puncak sistem dan seluruh lapisan karyawan karena adanya dalam mendasar perubahan manajemen yang sudah ada. Untuk mencapai tujuan tersebut perlu disusun kebijakan, manual dan prosedur yang memerlukan petugas khusus.

Karena peraturan ISM Code ini bersifat yang perusahaan mandatory, maka menerapkannya akan dipandang sebagai perusahaan yang memiliki keandalan dan citra yang baik. Karena, itu akan meningkatkan daya saing dan lebih menjamin kelangsungan hidup perusahaan. Perusahaan yang di samping itu, melaksanakan ISM Code dengan baik akhirnya akan mendapat keuntungan dari pemeliharaan dan pengoperasian kapal yang lebih teratur, mengurangi kecelakaan dan pencemaran sehingga biaya asuransi akan turun. ISM Code menuntut diadakannya internal audit sepanjang kegiatan operasi perusahaan, dengan tujuan untuk mengoreksi penyimpangan yang membahayakan dan merugikan, sehingga membutuhkan pembinaan kualitas SDM secara berkesinambungan.

Untuk merencanakan pelaksanaan ISM Code, dilakukan tahap-tahap sebagai berikut:

- a) Melakukan peninjauan kembali sistem manajemen perusahaan yang sedang berjalan.
- b) Menyusun kebijakan manual prosedur pelaksanaan operasional.
- c) Mengevaluasi dan menyempurnakan sistem manajemen keselamatan berdasarkan hasil audit percobaan-percobaan yang sudah dilakukan.
- d) Melakukan pemeriksaan terhadap manajemen di darat dan di atas kapal yang dioptimalkan untuk mendapatkan sertifikasi. Sertifikat yang diberikan dalam penerapan ISM Code ada 2 macam, yaitu:

a) Document of Compliance (DOC) untuk kantor atau perusahaan yang menyatakan Safety Management bahwa perusahaan mengaplikasikan System (SMS) tersebut telah yang memenuhi persyaratan dan ketentuan ISM Code b) Safety Management Certificate (SMC) untuk kapal yang dioperasikan, yang menyatakan bahwa kapal yang dioperasikan oleh perusahaan tersebut telah mengimplementasikan System (SMS) Management memenuhi persyaratan ISM Code.

Sistem Manajemen Keselamatan merupakan suatu kumpulan petunjuk dan peraturan tertulis dan dipakai oleh para karyawan sebagai melaksanakan kebijakan petunjuk dalam perusahaan dalam bidang keselamatan dan pencegahan kerusakan lingkungan (di laut), serta petunjuk praktis mengenai keselamatan dalam pengoperasian kapal.

Dokumentasi untuk ISM Code merupakan suatu Pedoman Manajemen Keselamatan atau Safety Management Manual (SMM). SMM ini harus senantiasa tersedia di darat dan di kapal. Ada dua jenis SMM, yaitu: SMM untuk pengoperasian di kapal. SMM untuk pengoperasian di laut. Petugas yang bekerja di kapal dan yang bekerja di darat harus saling mengetahui pekerjaannya masing-masing. Perwira di kapal juga harus menguasai instruksi kerja yang digunakan di kapal dan mengetahui langkah-langkah apa yang perlu diambil oleh petugas di darat sesuai organisasinya pada waktu terjadi kecelakaan.

Pembagian isi SMM dapat dikelompokkan menjadi enam kelompok. Dengan bantuan informasi itu, semua dokumen yang tertampung dalam daftar isian (check list) data dapat diikuti, kapan disetujui untuk mulai diaplikasikan, kapan dilaksanakan perubahan dan sebab apa dokumentasi tersebut perlu diubah. Ringkasan SMM. Di dalam buku Pedoman

Keselamatan tergambar bagaimana sistem manajemen di kapal dan di darat sehingga memenuhi elemen persyaratan yang dikehendaki oleh ISM Code, terutama hal yang menyangkut keselamatan dan perlindungan lingkungan.

Rencana Tindakan Darurat, dalam kondisi darurat, rencana tindakan darurat harus cepat dilaksanakan dengan tepat. Rencana tindakan darurat ini harus dipisahkan dari rencana pengoperasian kapal sehari-hari. Rencana keadaan darurat harus didokumentasikan dalam arsip khusus terpisah dari instruksi prosedur yang lain. Untuk dapat lebih sigap dalam suasana darurat, cepat mengambil tindakan. Prosedur kerja dalam kondisi darurat tersebut dilampirkan secara khusus dalam keadaan lengkap dengan daftar isiannya dan form yang terlampir dalam SMM.

Kesimpulan

Prosedur Instruksi kerja yang umum dalam pengoperasian sehari-hari adalah merupakan bagian dari SMM. Data dan gambar kapal serta perlengkapan yang berkaitan dengan keselamatan kapal lingkungan dan perlindungan yang digunakan dalam pengoperasian kapal harus disimpan secara khusus.

Segenap formulir yang diperlukan baik kapal dalam keadaan beroperasi atau pada keadaan darurat. ISM Code memfokuskan pada faktor manusia melalui manajemen keselamatan dan pencemaran laut yang banyak terkait dengan prosedur itu yang bertanggung jawab di belakang peralatan-peralatan. Melalui prosedur itu, maka ada kejelasan tanggung jawab, wewenang, cara-cara mengantisipasi, serta komitmen terhadap jiwa manusia maupun muatan kapal lainnya, ketika kapal beroperasi.

Untuk mendapatkan sertifikasi ISM Code, maka perusahaan pelayaran harus menyusun Sistem Manajemen Keselamatan yang terdiri atas Kebijakan Manajemen Keselamatan. Pedoman Manajemen Keselamatan. Prosedur Sistem Manajemen Keselamatan. Dokumen Manajemen Keselamatan (form, laporan, instruksi kerja, dsb).
