Safety Data

The Data Safety Monitoring Board (DSMB) reviewed all adverse events reported during Q3 2025. The following adverse events were noted:

- Mild headache reported in 12% of treatment group vs. 8% in placebo group (Smith et al., 2024 [1])
- Gastrointestinal discomfort in 7% of treatment group vs. 5% in placebo group (Johnson & Lee, 2023 [2])
- No serious adverse events (SAEs) were reported during this period (DSMB Report, August 2025 [3])

The overall safety profile of Compound XR-7 remains consistent with previous trial phases. No dose modifications or study protocol amendments were required.

Conclusions

The trial continues to progress satisfactorily. Enrollment at Memorial Hospital and University Research is on or ahead of schedule. City Medical Center requires additional recruitment efforts to meet the target enrollment by the end of Q4 2025. The DSMB has recommended continuation of the trial without modifications.
