

Here's some text. It has a comment.

I will add a comment to this one too.~~OOXML w:b (bold) tester: ST_OnOff variants, rStyle-only cases, rStyle + inline overrides, and a linked style pair (paragraph+character) to verify behavior.~~

A) ST_OnOff values for <w:b> on a run:

~~—w:b w:val=(w:val omitted):~~ **Sample text**

~~—w:b w:val=true:~~ **Sample text**

~~—w:b w:val=1:~~ **Sample text**

~~—w:b w:val=on:~~ **Sample text**

~~—w:b w:val=false:~~ Sample text

~~—w:b w:val=0:~~ Sample text

~~—w:b w:val=off:~~ Sample text

B) ~~rStyle-only cases (no inline <w:b>):~~

~~—rStyle='SD_BoldChar' (should be bold):~~ **Sample via SD_BoldChar**

~~—rStyle='Strong' (built-in bold):~~ **Sample via Strong**

~~—rStyle='SD_PlainChar' (not bold):~~ Sample via SD_PlainChar

C) ~~rStyle + inline <w:b> combinations (inline overrides style):~~

~~—rStyle='SD_BoldChar' + <w:b w:val='0'>=>~~ expect NOT bold: ~~Styled bold, overridden off~~

~~—rStyle='SD_BoldChar' + <w:b w:val='1'>=>~~ expect bold: **Styled bold, reinforced on**

~~—rStyle='SD_PlainChar' + <w:b w:val='on'>=>~~ expect bold: **Plain style, inline turns bold on**

~~—rStyle='Strong' + <w:b w:val='off'>=>~~ expect NOT bold: ~~Strong style, explicit bold off~~

~~—rStyle='Strong' + <w:b w:val='true'>=>~~ expect bold: **Strong style, inline bold on**

D) ~~Linked style (paragraph+character) demonstrations:~~

~~—rStyle='SD_LinkedHeadingChar' (character side of linked pair) =>~~ expect bold: **Linked Char style applied to run**

—~~rStyle='SD_LinkedHeadingChar' + <w:b w:val='0'>=> expect NOT bold: Linked Char style overridden off~~

—~~pStyle='SD_LinkedHeading' + inline <w:b w:val='0'>: Paragraph style makes text bold, but inline turns it off here~~

—~~pStyle='SD_LinkedHeading' (no inline) => expect bold: All runs inherit bold from the paragraph style~~

Table examples (linked style + inline overrides):

rStyle='SD_LinkedHeadingChar' (no inline)	Should be bold
rStyle='SD_LinkedHeadingChar' + w:b='0'	Should NOT be bold
