

OOXML w:highlight tester—enumerates ST_HighlightColor values, rStyle-only highlights, inline overrides, and linked styles.

A) <w:highlight> values:

—w:highlight w:val='yellow': Highlight sample

—w:highlight w:val='green': Highlight sample

—w:highlight w:val='cyan': Highlight sample

—w:highlight w:val='magenta': Highlight sample

—w:highlight w:val='blue': Highlight sample

—w:highlight w:val='red': Highlight sample

—w:highlight w:val='darkYellow': Highlight sample

—w:highlight w:val='darkGreen': Highlight sample

—w:highlight w:val='darkCyan': Highlight sample

—w:highlight w:val='darkMagenta': Highlight sample

—w:highlight w:val='darkBlue': Highlight sample

—w:highlight w:val='darkRed': Highlight sample

—w:highlight w:val='darkGray': Highlight sample

—w:highlight w:val='lightGray': Highlight sample

—w:highlight w:val='black': Highlight sample

—w:highlight w:val='white': Highlight sample

—w:highlight w:val='none': Highlight sample

B) rStyle-only (character style sets highlight):

—rStyle='SD_HighlightYellowChar': Styled yellow highlight

—rStyle='SD_HighlightLightGrayChar': Styled lightGray highlight

—rStyle='SD_HighlightNoneChar': Styled none (no highlight)

C) rStyle + inline <w:highlight> (inline overrides style):

—rStyle='SD_HighlightYellowChar' + inline 'none' => expect no highlight: Yellow style overridden to none

—rStyle='SD_HighlightNoneChar' + inline 'darkBlue' => expect darkBlue: None style overridden to darkBlue

D) Linked style pair (paragraph+character) with highlight:

—rStyle='SD_LinkedHighlightHeadingChar' => yellow: Linked Char style applied

—pStyle='SD_LinkedHighlightHeading' (lightGray) + inline 'red' on a run: This part should be red highlight overriding paragraph

Table examples (mixed highlight):

Requirement Number and DefinitionrStyle=Yellow

Identify the customized control name / identifier for each control used to meet the Customized Approach Objective. <i>(Note: use the Customized Control name from the assessed entity's controls matrix)</i> rStyle=None + inline darkMagenta	DarkMagenta cell
Describe each control used to meet the Customized Approach Objective. <i>(Note: Refer to the Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures for the Customized Approach Objective)</i>	—
Describe how the control(s) meet the Customized Approach Objective.	—
Identify the Controls Matrix documentation reviewed that supports a customized approach for this requirement.	—
Identify the Targeted Risk Analysis documentation reviewed that supports the customized approach for this requirement.	—
Identify name(s) of the assessor(s) who attests that: - The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and the results of the Controls Matrix support the customized approach for this requirement. - The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and that the results of the Risk Analysis support use of the customized approach for this requirement.	—

Requirement Number and Definition

Yellow-cell

Describe the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

Note 1: *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

Note 2: *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the "Assessor-derived testing procedure" are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here: —	Identify what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.) Note: <i>all items tested must be uniquely identified.</i>	—
	Identify all evidence examined for this testing procedure.	—
	Describe the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.	—

Document the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

Note 1: *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

Note 2: *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the "Assessor-derived testing procedure" are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here: —	Identify what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.) Note: <i>all items tested must be uniquely identified.</i>	—
	Identify all evidence examined for this testing procedure.	—
