

OOXML ~~w:u (underline)strike~~ tester covering all– ST Underline values, style- and linked-style-
driven underlines, and~~OnOff forms, rStyle-only strike, inline overrides. Some samples include~~
spaces to show the 'words' underline variant, and linked styles. (Bonus: a line with w:dstrike.)

A) ~~<w:strike>~~ ST Underline w:u@val~~OnOff~~ variants:

~~- w:u—w:strike w:val=(omitted): Strikethrough sample~~

~~—w:strike w:val='single': Sample text with spacestrue: Strikethrough sample~~

~~- w:ustrike w:val='words': Sample text with spaces1: Strikethrough sample~~

~~- w:ustrike w:val='double': Sample text with spaceson: Strikethrough sample~~

~~- w:ustrike w:val='thick': Sample text with spacesfalse: Strikethrough sample~~

~~- w:ustrike w:val='dotted': Sample text with spaces0: Strikethrough sample~~

~~- w:ustrike w:val='dottedHeavy': Sample text with spacesoff: Strikethrough sample~~

~~- w:u w:val='dash': Sample text with spaces~~

~~- w:u w:val='dashedHeavy': Sample text with spaces~~

~~- w:u w:val='dashLong': Sample text with spaces~~

~~- w:u w:val='dashLongHeavy': Sample text with spaces~~

~~- w:u w:val='dotDash': Sample text with spaces~~

~~- w:u w:val='dashDotHeavy': Sample text with spaces~~

~~- w:u w:val='dotDotDash': Sample text with spaces~~

~~- w:u w:val='dashDotDotHeavy': Sample text with spaces~~

~~- w:u w:val='wave': Sample text with spaces~~

~~- w:u w:val='wavyHeavy': Sample text with spaces~~

~~- w:u w:val='wavyDouble': Sample text with spaces~~

~~- w:u w:val='none': Sample text with spaces~~

B) rStyle-only (character style rPr defines underline, strike (no inline <w:ustrike>):

~~- rStyle='SD_UnderlineSingleChar'StrikeChar' => expect single underlinestrikethrough: **Styled**~~
underline (single)strike

- rStyle='SD_UnderlineDoubleChar'NoStrikeChar' => expect double underlinenormal text: **Styled underline (double)**

- rStyle='SD_UnderlineNoneChar' => expect **no underline**: Styled underline (none)-strike

C) rStyle + inline <w:combinationsstrike> (inline overrides style):

- rStyle='SD_UnderlineSingleChar' + w:u='none'StrikeChar' + inline 'off' => expect NOT underlined: Style single, inline none cancelsstrikethrough: Strike style overridden off

- rStyle='SD_UnderlineNoneChar' + w:u='wavyDouble'NoStrikeChar' + inline 'on' => expect wavy double: Style none, inline wavyDouble appliesstrikethrough: No strike style overridden on

- rStyle='SD_UnderlineDoubleChar' + w:u='dash' => expect dashed: Style double, inline dash wins

D) Linked style pair (paragraph+character) demonstrationswith-strike:

- rStyle='SD_LinkedUnderlineHeadingChar' (character side) => expect single underlineLinkedStrikeHeadingChar'=> strike: **Linked Char style applied to run**

- rStyle='SD_LinkedUnderlineHeadingChar' + w:u='none' => expect NOT underlined: Linked Char style overridden off

- **pStyle='SD_LinkedUnderlineHeading'LinkedStrikeHeading' + inline 'dashLongHeavy'off on** part of the line a run: **This part should NOT be** dashLongHeavystruck

E) Underline color/theme examples:

- w:u w:val='single' w:color='FF0000' (red underline): Red underline sample

- w:u w:val='wave' w:themeColor='accent1' (theme-based underline color): Theme-colored wave underline sample

Table examples (varied underline stylesstrike combos):

w:u='thick'rStyle=Strike Thick underlineStruck eef

rStyle='SD_UnderlineDoubleChar'NoStrike + **Should NOT be** underlinedstruck
inline 'none'on

Bonus) <w:dstrike/> example (double strike): Double struck sample
