| <b><u>Identify the Targeted Risk Analysis documentation</u></b><br>reviewed that supports the customized approach for this-<br>requirement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     | —                           |                            |
| <b><u>Identify</u></b> name(s) of the assessor(s) who attests that:<br><ul style="list-style-type: none"><li>• <u>The entity completed the Controls Matrix including all-</u><br/><u>information specified in the Controls Matrix Template in</u><br/><u>PCI DSS v4.x: Sample Templates to Support Customized</u><br/><u>Approach on the PCI SSC website,</u> and the results of the<br/>Controls Matrix support the customized approach for this<br/>requirement.</li><li>• The entity completed the Targeted Risk Analysis-<br/>including all information specified in the Targeted Risk-<br/>Analysis Template in <i>PCI DSS v4.x: Sample Templates-</i><br/><i>to Support Customized Approach on the PCI SSC-</i><br/><i>website,</i> and that the results of the Risk Analysis support-<br/>use of the customized approach for this requirement.</li></ul> | —                           |                            |

**Describe** the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

***Note 1:** Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

***Note 2:** Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

***Note:** all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.

—

**Describe** the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.

—

**Document** the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

***Note 1:** Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

***Note 2:** Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

***Note:** all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.
