

Article information:

Feasibility and Safety of Right and Left Heart Catheterization Via an Antecubital Fossa Vein and the Radial Artery in Patients With Heart Failure - PubMed

<https://pubmed.tongyongbei.com/28623670/>

Article summary:

1. -
2. -
3. 493 -

Article rating:

Appears moderately imbalanced: The article provides some useful information, but is missing several important points or pieces of evidence that would be required to present the discussed topics in a balanced and reliable way. You are encouraged to seek a more balanced perspective on the presented issues by exploring the provided research topics and looking at different information sources.

Article analysis:

Topics for further research:

- Information bias and selection bias
- Limited sample size and single-center data
- Lack of generalizability
- Need for further validation
- Potential risks and complications
- Large-scale
- multicenter
- prospective studies
