*After the retention period has elapsed, the University will be responsible for properly disposing of this document.

*The font to be used shall be 10.5 point. If there are not enough lines, please increase the number of lines as necessary.

Please delete the entry instructions (in blue font) and this box before submission.

1. Your reason for wishing to become a RARA Student Fellow (in no more than 250 words)

2. Your ability to conduct own research based on past research activities

Please state, as specific as possible, your strengths regarding research and how you will be able to conduct research and achieve results (in no more than one page, approx. 800 words).

*In filling out the form, please be specific in terms of, for example, initiative in conducting research, ingenuity, problem-resolving ability, breadth and depth of knowledge, technical skills, communication skills, and presentation skills.

3. Research plan

Please describe your research plan during the appointment period from the viewpoint of resolving social issues, citing your past research achievements, etc. (in no more than one page, approx. 800 words).

*Current students of Ritsumeikan University are requested to extract their research achievements from the “Ri-SEARCH (Ritsumeikan University Search Engine of Academic Record and Career History of Young Researchers)” and submit it alongside of other application documents.

- (1) Positioning of the research (including background on the status of and issues in the field)
- (2) Research objectives and content (what is the plan, what and to what extent will be clarified, what social issues will be resolved, etc.)
- (3) Distinctive and original aspects of the research (in addition to comparisons with previous research and future prospects, please describe any target publication or publications, etc. which you intend to submit to or write).
- (4) Prospects for obtaining a doctoral degree (please describe how you will work toward obtaining a doctoral degree within the standard period of degree completion)

4. Conformity of the program with your career vision and plans to realize it

Please describe your career vision while conducting research as a Student Fellow (or the image of the researcher you aspire to become, if you are aiming for academia). Please also mention what approach you will take to realize this, your collaboration with other researchers, and your notion of competence and career development. (in no more than 400 words).
