December 2023 Update on MassHealth Redetermination

Background on MassHealth redeterminations

In March 2020, the federal government declared a public health emergency (PHE) due to the COVID-19 pandemic. In response to the PHE and consistent with federal requirements, MassHealth put protections in place that prevented members' MassHealth coverage from ending during the COVID-19 emergency. On April 1, 2023, these continuous coverage protections ended and MassHealth began the year-long process to redetermine all members' eligibility, as required by CMS.

About the redeterminations data dashboard

MassHealth is committed to publishing a monthly dashboard that provides data on MassHealth's caseload and detail on members joining and departing from MassHealth. This transparency will be critical to identifying populations that require additional support during the redetermination period and will give the public greater visibility into this important initiative. The dashboard will provide data through the end of the month prior to each release; for example, the December dashboard update contains enrollment data through the end of November 2023.

Highlights from December 2023 dashboard

November Data

Overall, during November 2023, the MassHealth caseload decreased by approximately 101,000 members, or 4.56%, from the prior month. Approximately 16,000 members newly gained coverage, approximately 12,000 re-joined coverage, and approximately 129,000 departed.¹

- The ~16,000 arrivals are slightly lower than in past months.
- The ~12,000 member re-openings reflect members who departed and re-joined MassHealth within 12 months. This represents a small fraction of all disenrolled individuals and is a far lower rate of re-opening than MassHealth observed before the COVID-19 Public Health Emergency.
- The ~129,000 departures represent an expected increase in volume of departures as the redeterminations process continued for a seventh month. More information about this expected increase in closures through the end of the year can be found below (See: Expected Increase in Closures through End-of-Year).
 - o For context, prior to the COVID-19 Public Health Emergency, approximately 52,000 members departed MassHealth coverage each month (based on data from CY2018 and CY2019).
 - o Since April 2023, MassHealth has averaged approximately 57,000 departures per month.
- * MassHealth initiated redeterminations for approximately 187,000 members in November and is on track to initiate all 2.4M renewals during the 12-month "unwinding" period.

¹ Some members who join or re-join MassHealth are eligible for retroactive enrollment. As a result, caseload data reported in prior months' dashboard may fluctuate in each month's dashboard. For example, in last month's dashboard, we reported an October caseload of 2,289.4K members. This month's dashboard now shows 2,304.1K members in October, reflecting retroactive enrollments and reopenings.

Aggregate Data since Beginning of Redeterminations in April

- Since redeterminations began in April, MassHealth has seen a net decrease of 8.43%, or ~203K members, in its caseload. MassHealth expects to see a substantial increase in departures in the months ahead, as more members go through the renewal process.
- Children have seen the lowest rate of disenrollment of any age group; enrollment of members under age 20 has been flat from April through the end of November, whereas adults' enrollment has declined.
- To date, ~38% of disenrolled members lost coverage because MassHealth confirmed that they are ineligible. ~59% of disenrolled members lost coverage due to insufficient information.
- While MassHealth's overall caseload has decreased by approximately 203K individuals since April 2023, the Massachusetts Health Connector's enrollment has grown by 48K. This suggests that a large portion of the individuals who have lost MassHealth eligibility are able to obtain affordable coverage through the MA Health Connector. This rate remains much higher than what is observed in other states.

Expected Increase in Closures through End-of-Year

MassHealth saw an expected increase in the number of departures for the month of November and anticipates December 2023 to see a significant number of departures as well, based in part on eligibility changes leading up to Massachusetts Health Connector's open enrollment process. Those eligibility changes are described in detail below:

- In August and September, MassHealth initiated renewals for members in mixed households (i.e., households where some members are on MassHealth, and some are on the Health Connector). Some members who are determined ineligible for MassHealth coverage during the mixed household renewal process, but are eligible for certain types of Health Connector coverage, receive additional time before disenrolling from MassHealth; they maintain MassHealth coverage for a longer period of time to better align with the Health Connector Open Enrollment Period, which ends in January 2024. This eases these members' transitions and minimizes any gaps in coverage. As a result, MassHealth expects December to see a significant amount of member departures.

How is MassHealth working to reach and support members?

Outreach efforts to members and collaboration with assisters (individuals available in the community to help members complete MassHealth renewals) have continued at a rapid pace.

- Through EOHHS's partnership with Health Care For All, canvassers have knocked on over 428K doors and community-based organizations have held over 2,800 events and activities in the 15 communities with the most members at risk of coverage loss.
- MassHealth Accountable Care Organizations and other health plans have made more than 1.1M outreach attempts via phone call, text message, and letter to members selected for renewal since April 2023. Additionally, MassHealth is partnering with health plans to directly assist members with completing renewal forms and applications.
- MassHealth is conducting a media campaign, which includes digital, traditional, and out of home ad placements, in over 30 communities with high MassHealth enrollment in the top four languages spoken by MassHealth members.
- Additionally, MassHealth has continued to expand member outreach efforts, including new member awareness efforts at 70+ grocery stores, ~600 libraries, ~1,800 schools, and additional statewide organizations such as the YMCA, Boys & Girls Club, etc.
- MassHealth has hosted several in-person renewal events in partnership with community organizations to support specific member populations through renewals, such as members who are experiencing homelessness.
- EOHHS held trainings specifically for eligibility specialists supporting members over age 65.
 - EOHHS executed >\$1.5M of grants to expand community assister capacity at 23 Community Based Organizations serving immigrants, refugees, older adults, and other vulnerable populations, as well as expanding assister capacity at Aging Services Access Points (ASAPs).

- EOHHS executed an additional \$1M grant in collaboration with the Health Connector to hire a team of 'Mobile Community Specialists' to conduct renewal assistance in the community.
