

RetoolWNY
Build it clean. Build it here.

Manufacturing Climate Technology Equipment/Software Investment

Retool WNY, a Jamestown Board of Public Utilities-led initiative, is designed to facilitate clean energy company formation or expansion, enhance regional workforce development, create jobs in the growing clean energy sector, and strengthen connections among clean energy manufacturers across the Western Southern Tier counties of Chautauqua, Cattaraugus, and Allegany.

As a part of the program there is funding of up to \$19,000 per company for a limited number of manufacturers to evaluate the potential and/or assist them in making direct investments in equipment/software to start or expand production of technologies and equipment utilized in the climate technology/clean energy sector.

This award is part of NYSERDA's "Accelerate the Southern Tier" program opportunity, which seeks to accelerate the formation and growth of early-stage clean energy companies in the Southern Tier and continues development of the region to help foster growth of clean energy technology businesses.

Equipment/software investment plans will outline the equipment to be purchased, total capital investment, increase in jobs (if applicable), and an explanation of how the equipment/software will be utilized for climate technology/clean energy manufacturing. The MOU and investment plans shall define the obligations and expectations of the Contractor and the manufacturer and define the program specific milestones to be achieved by the manufacturer company. NYSERDA's Project Manager will review background information about the participant to ensure they qualify for the program prior to an MOU or equipment/software investment plan being executed.

Attached is a draft fillable MOU for your company to complete. Please return the signed MOU to me at editonto@jamestownbpu.com as soon as possible as the grant funds are limited and the timeline for funding will end soon. Upon receipt we will review the MOU and provide any questions or feedback and obtain approval from NYSERDA. If approved, JBPU will complete the execution of the MOU. If the project has already commenced, we will need verification of the timeline.

We appreciate the opportunity to assist you and your business in our community.

Sincerely,

Ellen Ditonto
Business Development Coordinator

Memorandum of Understanding
between
Company Name (Company) & Legal Address
and
Jamestown Board of Public Utilities (JBPU), 92 Steele St, PO BOX 700, Jamestown NY 14702**

Dated Click or tap to enter a date.

WHEREAS, the JBPU has entered into an agreement as the lead agency with the New York State Energy Research and Development Authority (NYSERDA) numbered 154462 called Climate Technology Manufacturing in the Western Southern Tier for initiatives that facilitate the development, attraction, and growth of climate technology manufacturing companies in the Western Southern Tier (NYSERDA Agreement). The programs will leverage the region's early ecosystem development and climate technology business formation and acceleration success and will be aimed at helping current companies build and grow manufacturing and jobs in the climate technology sector as well as attracting high-potential climate technology companies to the region; and

WHEREAS the JBPU and the Company have agreed to collaborate as partners and create a business expansion and diversification project under the NYSERDA Agreement; and

WHEREAS Climate Technology is defined as: Innovation that supports decarbonization of the economy through hardware, software, technology-enabled services, data analytics, or processes that broadly reduce energy consumption, increase resource efficiency, reduce greenhouse gas emissions and/or enable the transition to a sustainable and decarbonized economy. For the purposes of this agreement, types of innovation for decarbonizing the economy may include development of new technologies, new methods of manufacturing and repair of climate technologies, retooling and development of equipment to produce products needed for climate technology implementation and production of other related climate technology equipment.

WHEREAS the Company Overview of your company and current products

NOW, THEREFORE, in consideration of the mutual interests described above, the parties agree to work together in the following manner:

The Company shall:

...provide a description of work such as what equipment will be purchased or what work will be done and the number of new jobs that will result.

This will enable the company to produce products or services for the climate technology sector. Provide description of how project will enable company to participate in a climate technology sector(s) utilizing language from the Climate Technology definition above.

The Company shall provide a project budget at the initiation of this MOU. The Company shall provide copies of all invoices and internal labor costs utilized in the performance of this agreement to the JBPU and shall provide access to JBPU to inspect the installed equipment and performance of that equipment. Documentation for project completion shall include changes to FTEs, facility production, sales, and/or examples of new products in the climate technology sector that can be manufactured by the company due to this agreement.

The JBPU shall:

Provide a onetime payment of \$2,000 at the execution of this agreement. Then, at the completion of the investment described by this agreement, the JBPU shall provide a onetime payment of up to \$17,000 after JBPU approval of the invoices, documentation, and attestation by the Company on the project completion and associated outcomes and after JBPU receives associated funding from NYSERDA. A combined amount of at least

\$25,500 must be invested to receive the full combined \$19,000 and if invoices indicate the project cost less than \$25,500, the JBPU will pay the lesser of \$19,000 or 75% of the project cost.

Nothing herein shall make the BPU liable for any costs or payments to the Company or other parties beyond the passthrough of funds from NYSEDA pursuant to the terms and conditions of the NYSEDA Agreement.

The total cost of the project is Click or tap here to enter text.

The JBPU will provide the lesser of 75% or \$19,000 toward this project at the completion of the project.

The Company expects to increase employment by # of full-time employees FTE's.

Separate and Unique, the JBPU and Company enter this MOU while wishing to maintain their own separate and unique missions and mandates, and their own accountabilities. Unless specifically provided otherwise, the cooperation between the Participants as outlined in this MOU shall not be construed as a legal form of partnership or other type of legal entity or personality. Each Participant shall accept full and sole responsibility for all expenses incurred by itself relating to this MOU. Nothing in this MOU shall be construed as superseding or interfering in any way with any agreements or contracts entered among the Participants, either prior to or subsequent to the signing of this MOU. Nothing in this MOU shall be construed as an exclusive working relationship. The Participants specifically acknowledge that this MOU is not an obligation of funds, nor does it constitute a legally binding commitment by any Participant or create any rights to any third party.

We, the undersigned have read and agree with this MOU. Further, as the lead agency for the Retool WNY initiative, the JBPU has reviewed the proposed project and approves it.
