Corinne Savignac, R.N., BScN, Nurse Clinician General Internal Medicine 705-523-7100 Extension 3315 Health Sciences North Horizon Santé-Nord 41 Ramsey Lake Road Sudbury, Ontario P3E 5J1 E-mail: csavignac@hsnsudbury.ca	Please see response from out ACU department. Have a great day.	 Intravesicular Instillation of Bacillus
Katie O'Quinn, BScN, RN Clinical Nurse Specialist-Surgical and Ambulatory Services Thunder Bay Regional Health Sciences Centre Office-807-684-6485 Pager-807-624-4382 oquinnk@tbh.net	In response to your question; at our facility the nurses RN and RPN in ambulatory care insert the foley catheter and the physician is the one actually instilling the medication. The medication is mixed by pharmacy under a hood as it is a live virus and then delivered up to the ambulatory care unit. We currently do not have any learning packages or policies for this.	
Jessica Schlegel <JRSchlegel@osmh.on.ca>	We do not do the BCG installs in OPD. That is done in oncology. We do the Dr. Carr's bladder installs. The pharmacy puts a kit together with the appropriated meds and we mix at the time of the clinic. Dr. Carr's has an hour shelf life, so best to prepare when the first patient arrives. Only takes a minuet to mix. Any more questions I will be glad to help.	

*Imbedding Attachments: When in a document, with the cursor in the place where you wish to insert another document as an icon, Go to Insert, choose "Object" (not 'file') choose "Create from File" browse for the file name from your directory, once found, check off "Display as Icon" select "OK" The document Icon now appears in this document where your cursor was positioned. Save the document you are working in and the imbedded icon with the document they relate to attached will also be saved to this document.
