S3 Appendix. Test questionnaire

This questionnaire is broadly based on the ZB MED ELN Guide (pp 45 to 49) [6].

Lab requirements

Does the ELN allow you to:

- Import and process special scientific formats?
- Export and process special scientific formats?
- Create your own templates (with drop-down menus to choose from a specified vocabulary)?
- Import templates or offer preconfigured templates? If so, which formats are supported?
- Share templates

- With members of your own research group?
- With external members who have a licence for the same ELN?
- With external members who have no ELN licence?

- Link to files outside the ELN?
- Work concurrently on the same documents as several other collaborators?

Does the ELN offer:

- The special data entry and processing aids you need (e.g., scientific calculator, formula editor, dictation devices, digital pen, animal module, antibodies module, plasmids module, strains and cells module)?
- Sample management and the possibility to create material databases within the ELN?
- Standard interfaces (e.g., connection to a Laboratory Information Management System (LIMS) or other software)?
- Collaboration functions (e.g., individual users and groups, role management)?

Usability

- Is the ELN easy to navigate?
- How easily can you access a folder you have uploaded and are now looking for?
- Are the options self-explanatory?
- Does the ELN allow you to insert images and tables?
- Does the ELN allow you to use any text formatting you want?
- Does the ELN allow for freehand drawing?
- Does the ELN organise data in a way that meets your needs?
- Are you confident the ELN will be easy to explain to senior lab members who are used to physical lab notebooks?
- Are you confident the ELN will be easy to explain to new lab members?

Good Research Practice (GRP)

Does the ELN allow you to:

- Search for keywords and experiments within the ELN using free text search, advanced search, database queries and special search queries (e.g., searches for chemical formulas and reactions)?
- Ensure evidentiary value (e.g., audit trail, electronic signature and time stamp)?
- Easily export backups? If yes, in which formats?
- Easily export the entire ELN (e.g., for archiving purposes, or to migrate it to another ELN)?

Does the ELN offer:

- Documentation and traceability in line with GSP?
- Compliance with special regulatory requirements (e.g., GxP, ISO, FERPA, HIPAA)?
- Access (at least “read only”) for a minimum of ten years?
- (In-built) archiving / backups?

Connection to Research Data Management (RDM) system

Does the ELN allow you to:

- Assign persistent identifiers (e.g., Digital Object Identifiers (DOIs))?
- Reference an open experiment or sample (e.g., with a Persistent Identifier (PID)), even if the folder structure changes in the future?

Does the ELN offer:

- Support for assigning metadata (e.g., input masks)?
- Automatic metadata harvesting (e.g., extraction from log files, export from Excel spreadsheets)?
- Integration of controlled vocabularies?

67 • A connection to repositories, publishing platforms, file sharing services?

68 • A connection to digital preservation systems?

69 IT and data security

70 Does the ELN allow you to:

71 • Protect sensitive data within the ELN?

72 • Store data locally at the institute or in the institute's own cloud?

73 • Run it on all operating systems (OS)?

74 Does the ELN offer:

75 • Application Programming Interfaces (APIs)?

76 • A deployment model: installation on the user's/institute's own server?

77 • Device-independent web-based access, also outside of your institute (e.g., via a VPN)?

78 • An exit strategy (outgoing migration)?

79 • Data migration from other systems (incoming migration)?

80 Miscellaneous

81 Does the ELN offer:

82 • A classroom edition for teaching?

83 • Default language/multi-language support?

84 The following aspects are important to you:

85 • ...

86 • ...

87 ...Title:

88 ~~ON THE JUDEAN POLITICAL INDEPENDENCE IN THE PERIOD OF~~
89 ~~THE HASMONEANS~~

Name of Author:

Dr. Okan AÇIL

Conflict of Interest: There is no conflict of interest or competing interests to declare that are relevant to the content of this article.

Abstract:

The Hasmoneans were an effective power in the Judean region in the second half of the second century BC and the first half of the first century BC. In the sources that provide information about the period and the region, there are some statements indicating that the Hasmoneans had lead a politically independent political structure by separating from the Seleucid State at some point during the period of their presence in the region. In fact, scholars today agree that the Hasmoneans ruled an independent state in history. There even seems to be a consensus among contemporary scholars that this independence took place during the reign of John Hyrcanus I. However, when the massive literature on the Hasmonean State is examined, various opinions are encountered that the independence in question was established by different leaders of the dynasty. Despite this situation, the lack of a study that addresses the issue with a holistic approach has been noticed. For this reason, in this study, different views are presented, pointing to the political independence of the Hasmoneans. Afterwards, these views were discussed within the framework of the phenomenon of political independence in the Hellenistic period, the conceptual framework of which we tried to present. Finally, among the results of the study, the possible reasons for the existing different views are pointed out and a relatively new argument is presented, indicating that the political independence of the Hasmonean State took place during the reign of Hyrcanus I, through literary sources, numismatic works and archaeological findings.

Keywords: Hasmoneans, independence, John Hyrcanus I, autonomy, Judea.

Note to Editor;

Dear Editor/s,

If the study is accepted for publication, I would like to add the following statement to the study.

"This article is an expansion of a topic covered in the author's PhD thesis titled "The Haşmonayim (Haşmonaylar) Hanedanlığı" completed in 2022. I would like to thank my thesis supervisor and TUBITAK, which supported the research I conducted at the University of Cambridge within the scope of my thesis studies under the 2214-A programme with the application number 1059B142000508."

Best Regards,
