

The low down on Prostrate Cancer

Prostate cancer survival is improving and has tripled in the last 40 years in the UK, probably because of PSA* testing. **When diagnosed at its earliest stage**, all (100%) people with prostate cancer will survive their disease for five years or more. Prostate cancer is more common in older men aged 75 to 79 years. Although it is not clearly linked to any preventable risk factors, there is some evidence that being active might help to lower your risk of developing prostate cancer. **Try to keep a healthy weight by being physically active and eating a healthy, balanced diet.**

If you notice changes in the way you urinate, this is more likely to be a sign of a very common problem called an **enlarged prostate**, or another health problem. And if you do have symptoms they can be caused by other things. But it's still a good idea to get it checked out. Possible changes include:

- difficulty starting to urinate or emptying your bladder
- a weak flow when you urinate
- a feeling that your bladder hasn't emptied properly
- dribbling urine after you finish urinating
- needing to urinate more often than usual, especially at night
- a sudden need to urinate – you may sometimes leak urine before you get to the toilet.

Some other symptoms, include:

- back pain, hip pain or pelvis pain
- problems getting or keeping an erection
- blood in the urine or semen
- unexplained weight loss.

These symptoms can all be caused by other health problems. But it's still **a good idea to tell your GP** about any symptoms so they can find out what's causing them and make sure you get the right treatment, if you need it.

Try not to be embarrassed. **Doctors are used to discussing intimate problems and will try to put you at ease.** If you're not sure about what to say to your GP, **print and fill out this form** and show it to them. This will help you have the conversation.

** The PSA test is a blood test that measures the amount of prostate specific antigen (PSA) in your blood. Your PSA levels can also be raised in prostate conditions that are not cancer (are benign) such as a urine infection.*

Evonik appoints EMCO-INORTECH ULC as distribution partner for polyurethane CASE market in Canada

PARSIPPANY, N.J., October 11, 2018—Evonik Corporation has recently appointed Canadian chemical distributor of specialty raw materials, EMCO-INORTECH ULC, to act as its national distributor for the polyurethane Coatings, Adhesives & Sealants and Elastomers (CASE) market in Canada.

As the leading supplier of additives to the polyurethane industry with world-class production facilities around the world, Evonik has a deep understanding of polyurethane chemistry and a strong product portfolio for the polyurethane CASE market.

Based in Terrebonne, Quebec, with regional public warehousing throughout Canada, EMCO-INORTECH is dedicated to the CASE market. With outstanding technical capabilities and a history of strong relationships with formulators developed over 25 years, this new partnership between Evonik and EMCO-INORTECH ULC will give Canadian formulators access to the highest level of products and services.

“Polyurethane is a versatile material ideally suited for a wide range of CASE applications and with EMCO-INORTECH’s knowledge of the local CASE markets, we hope to further develop our Canadian business,” said Peter Hohl, Vice President Americas, Comfort & Insulation, Evonik. “By developing better distribution channels we are well positioned to meet the current and future needs of the polyurethane CASE market.”

“We are proud to welcome Evonik Comfort & Insulation’s polyurethane catalysts into our product offerings. It will complete our extensive portfolio and will help to ensure growth and future innovation in the Canadian market. EMCO-INORTECH laboratory and dedicated technical sales force will work together to implement Evonik catalysts throughout Canada, and be part of the next generation of Polyurethane applications, which supports our legacy commitment “Beyond Chemistry,” said Jean-Baptiste Moranta, Vice President of Sales, Marketing & Operations for EMCO-INORTECH ULC.

Evonik is a market leader of polyurethanes additives and provides formulators with a wide array of advanced technologies and a broad toolbox that includes; catalysts (DABCO® and POLYCAT®), surfactants (TEGOSTAB® and DABCO®), curatives (VERSALINKS®), performance additives (DABCO® and ORTEGOL®), and release agents (GORAPUR®). With this comprehensive portfolio of additives, formulators in the CASE industries can optimize performance, enhance process efficiency, and improve product quality and the physical properties of the final product.

To learn more about the Evonik CASE additives for polyurethane formulation please visit the CASE pages and download our new Americas brochure at: www.evonik.com/polyurethane-additives.
