### **m:groupChr** ~~ECMA-376 §22.1.2.41~~ — All Variations

Each labeled line below is followed by the math object it describes. Empty m:chr should render with no bracket/arrow.

#### **1. Default (no groupChrPr) — expect U+23DF bottom curly, below base**

$$\underbrace{x + y + z}$$

#### **2. Empty m:chr (no m:val) — spec says character is hidden**

$$a + b$$

#### **3. Explicit bottom curly bracket U+23DF, pos=bot (underbrace)**

$$\underbrace{a + b + c}$$

#### **4. Top curly bracket U+23DE, pos=top (overbrace)**

$$\overbrace{x + y}$$

#### **5. Leftward arrow U+2190, pos=top**

$$\overleftarrow{n \text{ terms}}$$

#### **6. Rightward arrow U+2192, pos=bot**

$$\underline{\text{vector}}\rightarrow$$

#### **7. vertJc combo: pos=top, vertJc=top**

$$\overbrace{p+q}$$

8. ~~vertJc=combo: pos=top, vertJc=bot~~

$$\overbrace{r+s}$$

9. ~~vertJc=combo: pos=bot, vertJc=top~~

$$\underbrace{t+u}$$

10. ~~vertJc=combo: pos=bot, vertJc=bot~~

$$\underbrace{v+w}$$

11. ~~vertJc=with empty m:val (defaults to bot per spec)~~

$$\tilde{x}$$

12. ~~Complex base — summation inside groupChr~~

$$\underbrace{x_1 + x_2 + \cdots + x_n}$$
