

Water Conservation

Student Directions Day 1

Today, you are going to get ready to write an informative piece to answer this question:

What can you do to save water?

Day 1 Get ready to write.

- Watch the video, *The Adventures of EcoRilla*.
- Discuss this question briefly with your classmates: Why is it important to save water?
- Listen to the Reader's Theatre: *Water Wise-All About Water Conservation* carefully.
- What can you do to save water? Turn and talk to a partner about what you could do.
- Fold a piece of paper into quarters. Pick at least four things that you could do to save water. Draw a picture of each to show what you chose.

Water Conservation

Student Directions Day 2

Today, you are going to use what you have learned to write an informative piece to answer this question: What can you do to save water?

Day 2 Write!

- Listen to *Water Wise* again. Read along if you can.
 - What can you do to save water? Use the pictures you drew yesterday.
Turn to a partner, point to a picture. Tell what you might do and why that would be a good choice.
- When you have finished, write a piece explaining what you can do to save water.
 - What can you do to save water?
 - Be sure to give lots of examples and explain how each would save water.
Look back at *Water Wise* for ideas. Write as much as you can.

A good informative piece will:

1. Introduce the topic you are writing about
2. Clearly answer the question.
3. Give lots of examples.
4. "Wrap up" the piece with a concluding sentence.
5. Use capitals, periods and question marks, and spell words correctly.

When you have finished, be sure to check your work and fix any mistakes.
If you like, you may add pictures to show what you wrote. Have fun!

Grade 2 - Informative/Explanatory Writing Prompt

Teacher Directions

- Use the student prompt as directions for each session. The short video can be found on YouTube: Help the Environment -The Adventures of EcoRilla Episode 1 - EcoWater Canada http://www.youtube.com/watch?v=_ex1ZuKFw64. The video is recommended, but is optional.
- Provide each student with a copy of the prompt and the Reader's Theatre. The Reader's Theatre can be read aloud by the teacher or "performed" by older students or very competent readers. The teacher should feel comfortable rereading, explaining or clarifying directions as needed.
- The Reader's Theatre provides information that may be used to address the prompt and should be read aloud at least twice before writing. Encourage students to refer back to the text while writing. The teacher may provide help with reading words or phrases as needed.
- The prompt should be given two sessions. Allow approximately 30 minutes for each, but the prompt should not be strictly timed. Students should be given the time needed to write and proofread.
- The writing must be done without help, but students may have access to personal dictionaries, word walls or any other resources to support spelling and mechanics that they are accustomed to using while writing. Provide lined paper from your classroom for writing. Unlined paper may be provided for drawing.
- This will be first draft writing, but encourage students to proofread and correct any errors they find.

Water Wise
All About Water Conservation
A Super Science Script
Written and Developed by Lisa Blau

Water Expert #1 - Good morning! We are here to tell you all about the earth's most precious resource...

All - WATER!

Water Expert #2 - Every form of life needs water in order to live.

Water Expert #4 - A tiny fish needs water...

Water Expert #5 - A tall tree needs water...

Water Expert #3 - Everyone needs...

All - WATER!

Water Expert #2 - People need water to drink because our bodies need water to stay healthy.

Water Expert #3 - We also need water to make the crops grow so that we have food to eat.

Water Expert #4 - People use water for taking baths, brushing their teeth, and washing their clothes.

Water Expert #1 - Yes, everyone needs water.

Water Expert #2 - We know that water is precious so we must find ways to save all the water that we can.

Water Expert #3 - Now, you might be thinking...

Water Expert #5 - But, I'm just a kid. What can I do to save water?

Water Expert #4 - Well, we're here to tell you...

All - PLENTY!

Water Expert #1 - If you turn off the running water when you brush your teeth...

All - You can save 35 gallons of water in one week!

Water Expert #3 - If you take a shorter shower...

All - You can save 75 gallons of water in one week!

Water Expert #3 - You can help Mom or Dad fix leaky faucets and put water savers in your toilets.

Water Expert #5 - A plastic bottle filled with pebbles will do the job!

Water Expert #4 - Never play in sprinklers if your town is having a water shortage.

Water Expert #1 - Sure, it's tons of fun...

Water Expert #2 - You will use over 10 gallons of water in only one minute!

Water Expert #3 - By trying some of these tricks, you and your family can help save lots of water.

Water Expert #4 - Water is precious. What can you do to help save water?

Water Expert #1 - Make sure that the faucet is turned off all the way. Don't leave it dripping...

Water Expert #2 - Every drop counts you know!

Water Expert #3 - Don't use more water than you really need. You really don't need to fill your bathtub up all the way when you take a bath.

Water Expert #4 - You should use a broom...not the hose, to clean a driveway or sidewalk.

Water Expert #5 - And how many of you like to help out by washing the car? Well, be sure to save water when you wash the car.

Water Expert #2 - It's easy...just use a bucket to wash the car, and only use the hose to rinse it off.

All - We hope that you will be water wise and save lots of water. We know you can do it!

Water Expert #1 - The End.

The Law-Related Education Academy is sponsored by the Arizona Foundation for Legal Services & Education with funding made possible by the Arizona Department of Education School Safety Program.

~~"Respect for Authority" Academy~~

~~(Middle/High School)~~

~~Safety Concerns Lesson Plan~~

~~Please obtain administrator approval prior to implementing this lesson.~~

~~Objectives:~~

- ~~• Students will examine the most common risk factors associated with their age group.~~
- ~~• Students will review how rules and laws established by those in authority help keep them safe.~~
- ~~• Students will have an opportunity to show appreciation for those in authority who help keep them safe.~~

~~Protective Factor Developed: Connection/Commitment to school~~

~~Materials:~~

- ~~✓ Large poster paper and markers for each group~~
- ~~✓ Higher/Lower Signs~~
- ~~✓ Authority Figure Cards see slides, 1 per group~~
- ~~✓ Risky Situation Card, see slides~~
- ~~✓ Facilitator Guide pg. 4~~

~~Timeframe: 50 minutes~~

~~Team Teaching:~~ For effective implementation of Law Related Education (LRE), team teach with the classroom teacher by...

- ~~• Having both the officer and teacher rotate among students and to different groups. Both instructors will provide positive feedback and engage in friendly conversations with~~

~~students. This procedure will help reduce classroom disruptions, increase student engagement, and build supportive relationships with students.~~

- ~~● Encouraging classroom teachers to participate in all activities by injecting clarification statements by relating relevant content to their curriculum. In this method, students will see more connections to their student life and be willing to carry over concepts and skills learned in LRE.~~
- ~~● Assigning the classroom teacher part of the lesson instructions. Team teaching with the classroom teacher enables the students to further see the importance of LRE lessons. It also provides an opportunity for the classroom teacher to demonstrate teaching skills conducive for effective teaching. Student attention can be maintained more easily with different voices and personalities experienced throughout the lesson.~~

Lesson:

- ~~1. Divide students into small groups of 3 or 4 students each. Provide each group with large poster paper and markers.~~
- ~~2. Instruct students to visualize a sports player preparing for a game. Have each group pick a different sport (football, baseball, NASCAR) and have them discuss the risks associated with that sport. Have a group volunteer report out.~~
- ~~2. Next, have groups draw a picture of an athlete without any protective equipment. Now have groups discuss and brainstorm the different lengths an athlete goes through to prepare for a game. Instruct groups to add pieces of protective equipment to their athlete and record why each piece is important.~~
- ~~3. Have groups post their pictures on the walls and report about the risks, preparation, and protection needed for their sport.~~
- ~~4. After groups take their seats have them brainstorm safety concerns or risk factors for students at their age; be ready to report out.~~

~~**Possible Responses: make sure the administrator supports teaching these topics before expanding on them**~~

- ~~● Vehicle Accidents~~
 - ~~● DUI/ Driving with Persons Under the Influence~~
 - ~~● Violence/Bullying~~
 - ~~● Drug Use~~
 - ~~● Suicide~~
 - ~~● Teen Pregnancy~~
 - ~~● Cyber Bullying~~
 - ~~● Runaway~~
 - ~~● Date Rape / Sexual Exploitation~~
- ~~5. Next, inform the class that they will be asked a series of questions regarding some risk factors/safety concerns they have mentioned. These questions will include facts about the specific risks and it will be their job to determine if the statistic is higher or lower than the number given. Post the following **signs: HIGHER LOWER** at the opposite end of the room. One will say 'Higher' the other 'Lower'. When a question is asked, they will stand under the sign they believe is correct. Is the true statistic 'Higher' or 'Lower' than the one provided?~~

6. Read the statistics from the **Facilitator Guide (pg. 4)**. Give the students an opportunity to stand under the sign they believe represents the true answer. After a few students have explained why they chose their answer, provide the correct answer, and discuss their feelings on the statistics. Whether it was a higher or lower statistic than what was expected. After all questions have been asked, instruct students to return to their groups at their desks.
7. Next, remind students that people in positions of authority have the responsibility to protect youth in the discussed risky situations. Assign each group an authority figure or let groups pick from the **Authority Figure Cards (See Slides)**. They should also pick a **Risky Situation Card (See slides)**. Have them draw a picture of that authority figure equipped with tools to protect minors and help reduce the risk on their card. Be ready to share and explain your drawing.
8. Next, instruct the groups to develop a celebration or way of showing appreciation to their authority figure that students could get involved with.
9. Call on each group to present their idea to the class. (Optional: Work with a teacher to choose a student idea that could be possible and help students organize the appreciation celebration.)
10. Debrief the lesson by instructing the groups to take turns sharing with their group an authority figure they respect and how they help youth reduce their risks and keep them safe.
11. Call on volunteers to share their person with the class and tell why they chose them.
