

# Vaping-Associated Pulmonary Injury Weekly Update Report

*As of October 30, 2019*

This chart will be updated every Wednesday following reporting to the Centers for Disease Control and Prevention (CDC).

## Cases reported

Massachusetts cases\* that meet the [CDC definition of vaping-associated pulmonary injury](#):

|                  |    |
|------------------|----|
| <b>Confirmed</b> | 20 |
| <b>Probable</b>  | 41 |

## Statistics

Statistics based on above confirmed and probable cases:

| CATEGORY                                        | NUMBER OF CONFIRMED AND PROBABLE CASES | PERCENTAGE** |
|-------------------------------------------------|----------------------------------------|--------------|
| <b>Gender</b>                                   |                                        |              |
| Male                                            | 27                                     | 44%          |
| Female                                          | 34                                     | 56%          |
| <b>Age</b>                                      |                                        |              |
| Under age 30                                    | 31                                     | 51%          |
| Ages 30 – 49                                    | 16                                     | 26%          |
| Ages 50+                                        | 14                                     | 23%          |
| <b>Did this case result in hospitalization?</b> |                                        |              |
| Yes, patient was hospitalized                   | 50                                     | 82%          |
| No, patient was not hospitalized                | 11                                     | 18%          |
| <b>Substance reported to have been vaped *</b>  |                                        |              |
| Nicotine only                                   | 18                                     | 30%          |
| THC only                                        | 24                                     | 39%          |
| Nicotine and THC                                | 15                                     | 25%          |
| CBD                                             | <5***                                  |              |
| Other/Unknown                                   | <5***                                  |              |

\* Case investigations are ongoing and these data are subject to change.

\*\* Total may not add up to 100 percent due to rounding.

\*\*\* Numbers under 5 are suppressed consistent with Departmental patient privacy and confidentiality policies.
