| <p><b><u>Identify the Targeted Risk Analysis documentation reviewed that supports the customized approach for this requirement.</u></b></p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           | — |
| <p><b><u>Identify name(s) of the assessor(s) who attests that:</u></b></p> <ul style="list-style-type: none"> <li>• <u>The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website, and the results of the Controls Matrix support the customized approach for this requirement.</u></li> <li>• <u>The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website, and that the results of the Risk Analysis support use of the customized approach for this requirement.</u></li> </ul> | — |

**Requirement Number and Definition**

**Describe** the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

**Note 1:** *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

**Note 2:** *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the "Assessor-derived testing procedure" are copied for each assessor-derived testing procedure that is added.*

|                                                                | <b><u>Identify</u></b> all evidence examined for this testing procedure.                                                                                                                                                    | — |
|                                                                | <b><u>Describe</u></b> the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.                        | — |

**Requirement Number and Definition**

**Document** the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

**Note 1:** *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

**Note 2:** *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the "Assessor-derived testing procedure" are copied for each assessor-derived testing procedure that is added.*
