Before the end of the first year, counted from the date of enrolment, the PhD student, with the assistance of his or her Director and tutor, will draw up a document that includes a research plan and a personal training plan. The research plan will include at least the methodology to be used and the objectives to be achieved, as well as the means and timetable for achieving them. The personal training plan of the doctoral student will contain a forecast of the different training activities to be carried out during the doctoral thesis (courses, seminars, mobility activities, etc.). This document may be improved and detailed throughout their stay on the programme and must be endorsed by the Director and the tutor.

7. On an annual basis, the programme's Academic Committee will evaluate the progress of the doctoral student in terms of the research plan and the activities document, together with the reports to be issued by the Director and the tutor for this purpose. In the event that the Academic Committee detects significant shortcomings, the PhD student must be reassessed within a maximum period of six months. If the shortcomings continue to occur, the Academic Committee must issue a reasoned report, after hearing the interested party, and the doctoral student will be permanently withdrawn from the programme.
