

PPG Meeting
31/07/2025 – Start Time 13:13

Attendees:

MN – Deputy Manager

SA – Practice Manager

MC, GM,

JB, BB, ZF, JS, SN, AW

Apologies:

CC, AK, LU, MAS, DR

- Review of last minutes of meeting – everyone agreed no changes were needed.
- Meeting started at 13:13
- Asked PPG members if they would like anything to be added on Agenda to discuss in todays meeting.
- Discussed 2025 national survey report for the Practice. Gave each patient a coloured copy of the report to review. Once they had reviewed results, they were then given a coloured copy of last years report to compare the scores.
- The report was explained by Practice Manager. This is a national survey sent out yearly to randomly selected patients each year and returned to the provider. The results are of those who have returned the survey. Once they compile the results along with all the other practices, they then publish the national data online and notify the Practices of their results.
- PM went through each question and compared the data with the PPG members. On each question asked the Practice improved the percentage compared to last year.
- PPG members were asked what the Practice could do to get more patients to engage with completing such surveys.
- When checking data online you can also check neighbouring practices, and we compared ours to our PCN practice and we could see a higher percentage of returned surveys for other practices.
- SN suggested we send out text messages when we know surveys will be sent out and if patients struggle to complete, we could ask them to bring into the Surgery to help.
- MN explained that as we are not the ones sending out the surveys, we wouldn't know which patients the survey gets sent too and this would mean we would have to send a text msg to all 6000 patients registered at the Practice.

- MN also highlighted that we do not want any influence on the answers provided and we would like honest feedback from the patients. The patients if they do come in for help may feel obliged to give better scoring than how they actually feel.
- Overall, we are satisfied the outcome of the survey results – we will try and educate the patients who attend the surgery and encourage them to complete such forms/surveys in the future.
- Also decided to display notices before they get sent out.
- Updated the members about not being able to prescribe Mounjaro and this needs to be done through weight management.
- BB asked when they will be able to book in for flu jab. MN explained Flu Season starts from October. MN also explained that the local pharmacies received the vaccines around 2-3 weeks before GP practices if they wish to have it sooner they can find out from their local chemist.
- The Practice has not yet received a confirmation date of delivery for flu jabs.
- Updates around the PCN clinics were shared.
- Meeting was kept brief due to summer holidays and many apologies.

Meeting adjourned 13:51

Next meeting: October 2025

Insurance Data Transfer Guide

~~Model User Guide Requirements for the transmission of insurance policy data to support the verification of mandatory auto insurance.~~

Section One

Introduction to the Model User Guide Requirements for transmitting insurance policy data

The IICMVA supports the use of the IICMVA Online Insurance Verification Model using web services technology and does not consider a data transfer process (often referred to as a Book of Business data transfer) to be part of the Online Insurance Verification Model.

However, the IICMVA also recognizes that a jurisdiction may want a one-time data file transfer to establish a current insurance company of record to associate with their registered vehicles. This process is intended for the express purpose of facilitating a jurisdiction's ability to send an online insurance verification query.

If a jurisdiction determines there is a need for insurance companies to provide additional insurance information, the IICMVA has established this guide which defines a standardized methodology and data file format for the consistent submission, implementation and use of the provided supplemental data.

Section Two

Data File Transfer Guidelines

Data Transfer Process

This section provides guidance for supporting the online insurance verification model. If a state implements the following process, IICMVA recommends a one-time data transfer. This process eliminates the need for the industry to resolve unmatched vehicle records. Prior to electing to implement this process, full consideration of the following inherent limitations of “point-in-time” data files should be evaluated:

~~— Data elements often do not match~~

~~Collection of data, such as policy numbers, VINs, and customer information by separate entities may result in mismatched data. Consequently, data transfer files may not match all registered vehicles.~~

~~— Participation by commercial insurers may not be possible~~

~~The need to collect and process vehicle data elements varies among commercial insurers. Since some commercial insurers do not maintain specific vehicle data, they would not be able to provide this information and a secondary method may need to be implemented.~~

~~— Data may be restricted to jurisdictional boundaries~~

~~Auto liability policies are commonly written in the state the vehicle is garaged. The state where the policy is written could differ from the state in which the vehicle is registered. Consequently, insurance companies may not be able to identify the correct state of registration for each insured vehicle. This may result in submission of data files that do not contain all vehicles that are registered in the policy state and conversely, may contain vehicles that are not registered in the policy state.~~

~~— Data provided is only valid at the time the file is created~~

~~Policy changes and transfers between companies occur frequently and will result in some portion of the data provided to become obsolete after a data file is created. As a result, the current insurer of record of some registered vehicles may be misidentified.~~

The following process flow diagram has been provided to illustrate the electronic data transfer process:

1 - Submission of Data Files

Each insurer will send a data file via agreed upon electronic method of transmission. File Transfer Protocol (FTP) with Pretty Good Privacy (PGP) compatible encryption is the recommended method for submitting data to the state's designated Internet Protocol (IP) address.

2- State's System—Receipt of Insurance Data Files

The state's application will verify that each company has sent an insurance data file. If a file has not been received from a specific insurance company, the company's designated contacts should be notified immediately via e-mail or other agreed upon electronic notification method.

3- State's System—File Format Validation

Upon receiving data files, the state or its designated vendor will validate the file format to ensure that it adheres to the standard as outlined in this document. Files that fail to meet the set standard will be rejected by the state's system. The rejection can be conveyed in the form of an e-mail or automated electronic notification to the respective company's designated contact. An option for insurance companies to receive a notification of the file's acceptance will also be available. The impacted insurance company will then have an opportunity to correct and resubmit the data files.

4- State's System—File Process

The state's system will incorporate a process to identify the current insurer of record. Note: The return of individual records to the submitting insurance company for further processing is not within the scope of this process.

5—State Jurisdiction—Insurance Verification Process

The state, upon receiving notification of vehicles from the file processing system, has the option to request proof of insurance coverage directly from the registrants of those vehicles. If the state so chooses, the information provided by the vehicle registrants can be used to verify coverage directly with the insurance company by using the IICMVA Online Insurance Verification Model web service.

Data File Format

The data in each record shall always be recorded in fixed length fields using the 7-bit American Standard Code for Information Interchange (ASCII).

The field name “Mandatory/Optional” is used to identify data which is required (Mandatory) or optionally (Optional) provided by the entity transmitting the file. “Optional” data fields will be transmitted at the discretion of the insurance company based upon the submitting company’s independent business rules.

Transmission methods and security processes allow for the identification of sender and receiver of data which eliminates the need for a header record. The trailer record was included to allow the receiver to validate all data sent was received.

Each record shall consist of a record size of 300 bytes and adhere to the following structures:

Detail Record

Field Name	Length	Begin	End	Type	Mandatory /Optional	Description
POLICY TYPE	2	1	2	AN	M	‘VS’ – Vehicle Specific ‘NS’ – Non Vehicle Specific
NAIC	5	3	7	N	M	NAIC Code
POLICY NUMBER	30	8	37	AN	M	Policy Number
EFFECTIVE DATE	8	38	45	N	M	Effective Date—YYYYMMDD format
VIN	25	46	70	AN	Ø	VIN (optional for non-vehicle-specific policy)
LAST NAME or ORGANIZATION	40	71	110	AN	Ø	
PREFIX—NAME ABBR	3	111	113	AN	Ø	
MIDDLE NAME	20	114	133	AN	Ø	
FIRST NAME	40	134	173	AN	Ø	

SUFFIX NAME	3	174	176	AN	Θ	Abbreviated Name Suffix (JR, SR, etc)
FEIN	9	177	185	AN	Θ	
ADDRESS	50	186	235	AN	Θ	
CITY	35	236	270	AN	Θ	
STATE	2	271	272	AN	Θ	
ZIP	5	273	277	N	Θ	
COMMERCIAL POLICY INDICATOR	1	278	278	AN	Θ	Y for Commercial Policy
FILLER	23	278	300	AN	M	Space Filled

Trailer Record

Field Name	Length	Begin	End	Type	Mandatory /Optional	Description
TYPE	2	1	2	AN	M	'TR' = Trailer
RECORD COUNT	12	3	14	N	M	Record count not including Trailer Record
PROCESS DATE	8	15	22	N	M	Date the file was created — YYYYMMDD Format
FILLER	278	23	300	AN	M	Space Filled
