|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--------|
| <b>Identify the customized control name / identifier</b> for each control used to meet the Customized Approach Objective.<br><i>(Note: use the Customized Control name from the assessed entity's controls matrix)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |   | __r4e4 |
| <b>Describe each</b> control used to meet the Customized Approach Objective.<br><i>(Note: Refer to the Payment Card Industry Data Security Standard (PCI DSS) Requirements and Testing Procedures for the Customized Approach Objective)</i>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |   | __r2e2 |
| <b>Describe how</b> the control(s) meet the Customized Approach Objective.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | — |        |
| <b>Identify the Controls Matrix documentation</b> reviewed that supports a customized approach for this requirement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | — |        |
| <b>Identify the Targeted Risk Analysis documentation</b> reviewed that supports the customized approach for this requirement.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | — |        |
| <b>Identify</b> name(s) of the assessor(s) who attests that: <ul style="list-style-type: none"><li>The entity completed the Controls Matrix including all information specified in the Controls Matrix Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and the results of the Controls Matrix support the customized approach for this requirement.</li><li>The entity completed the Targeted Risk Analysis including all information specified in the Targeted Risk Analysis Template in <i>PCI DSS v4.x: Sample Templates to Support Customized Approach on the PCI SSC website</i>, and that the results of the Risk Analysis support use of the customized approach for this requirement.</li></ul> | — |        |

**Describe** the testing procedures derived and performed by the assessor to validate that the **implemented controls meet the Customized Approach Objective**; for example, whether the customized control(s) is sufficiently robust to provide at least an equivalent level of protection as provided by the defined approach.

**Note 1:** *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

**Note 2:** *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

**Note:** *all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.

—

**Describe** the results of the testing performed by the assessor for this testing procedure and how these results verify the implemented controls meet the Customized Approach Objective.

—

**Document** the testing procedures derived and performed by the assessor to validate **the controls are maintained to ensure ongoing effectiveness**; for example, how the entity monitors for control effectiveness and how control failures are detected, responded to, and the actions taken.

**Note 1:** *Technical reviews (for example, reviewing configuration settings, operating effectiveness, etc.) should be performed where possible and appropriate.*

**Note 2:** *Add additional rows for each assessor-derived testing procedure, as needed. Ensure that all rows to the right of the “Assessor-derived testing procedure” are copied for each assessor-derived testing procedure that is added.*

Enter assessor-derived testing procedure here:

—

**Identify** what was tested (for example, individuals interviewed, system components reviewed, processes observed, etc.)

**Note:** *all items tested must be uniquely identified.*

—

**Identify** all evidence examined for this testing procedure.
