Responder Info	
Hartley, Heather <HHartley@qhc.on.ca>	The urologists install our BCG treatments at the cysto clinic. These are prepared pharmacy. I don't have any competency checklists but we do have patients instructions. I ha attached if this is helpful.
Corinne Savignac, R.N., BScN, Nurse Clinician General Internal Medicine 705-523-7100 Extension 3315	Please see response from out ACU department. Have a great day.

Katie O'Quinn, BScN, RN Clinical Nurse Specialist-Surgical and Ambulatory Services Thunder Bay Regional Health Sciences Centre Office 807-684-6485 Pager 807-624-4382 equinnk@tbh.net	In response to your question; at our facility the nurses RN and RPN in ambulatory care insert the foley catheter and the physician is the one actually instilling the medication. The medication is mixed by pharmacy under a hood as it is a live virus and then delivered up to the ambulatory care unit. We currently do not have any learning packages or policies for this.
Jessica Schlegel <JRSchlegel@osmh.on.ca>	We do not do the BCG installs in OPD. That is done in oncology. We do the Dr. Carr's bladder installs. The pharmacy puts a kit together with the appropriated meds and we mix at the time of the clinic. Dr. Carr's has an hour shift life, so best to prepare when the first patient arrives. Only takes a minuet to mix. Any more questions I will be glad to help.
