

m:m Matrix Test Fixtures

Each section tests a different m:m matrix shape.

1. Plain 2x2 matrix (no delimiter)

$$\begin{matrix} a & b \\ c & d \end{matrix}$$

SuperDoc — m:limLow / m:limUpp test showcase (PR #2771)

~~1. limLow in m:func — lim over n to infinity: $\lim_{n \rightarrow \infty}$ —~~

2. 2x2 matrix inside [] delimiter

$$\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$$

~~3. MatrixBare m:limUpp — equals with def above: $\stackrel{def}{=}$ limLow with fraction in m:lim (nested math (fraction + superscript)): $\lim_{\frac{x}{y}}$ —~~

$$\begin{pmatrix} \frac{a}{b} & x \\ y & z^2 \end{pmatrix}$$

4. Matrix with multi-run cells (a+b)

$$\begin{bmatrix} a + b & c - d \\ x + y & p - q \end{bmatrix}$$

~~4. Bare m:limLow — non-function base: $\frac{a}{b}$~~

~~5. MatrixlimUpp in m:func — lim with empty cells (gaps) $\times$ above: $\lim_{\times}$ —~~

$$\begin{bmatrix} a & & c \\ & e & \\ & & f \end{bmatrix}$$

~~6. MatrixMulti-char non-function base (max): $\max_{x \in S}$ —~~

~~7. Multi-char non-function base (sup): $\sup_{n \geq 1}$ —~~

8. limLow with per-column justification (left/center/right) subscript in limit (deep recursion): $\lim_{x_t \rightarrow 0}$

$$\begin{array}{ccc} 1 & 2222 & 3 \\ 4444 & 5 & 6666 \end{array}$$

7. 1x3 row vector

$$[x \quad y \quad z]$$

8. 3x1 column vector

$$\begin{bmatrix} a \\ b \\ c \end{bmatrix}$$

9. Matrix with & character in cell (edge case)

$$x\& = 1 \quad y\& = 2$$

10. Inline matrix with baseJc=top

$$\begin{array}{cc} a+1 & 2+b \\ 3 & 4 \end{array}$$
