

Ouch . Comprehensive DOCX Features Demonstration

Commented [MW1]: A tachyon walks into a bar.

1. Inline Text Formatting

This section demonstrates various inline text formatting options.

1.1 Basic Formatting

Normal text, **bold text**, *italic text*, ***bold and italic***.

Single underline, double underline, wavy underline.

~~Strikethrough text~~, **highlighted text**, SMALL CAPS TEXT.

Mathematical notation: $x^2 + y = H_2O$

2. Font Types and Sizes

2.1 Different Font Types

Arial font (default sans-serif)

Times New Roman font (classic serif)

Calibri font (modern sans-serif)

Georgia font (elegant serif)

Verdana font (screen optimized)

Courier New font (monospace)

2.2 Different Font Sizes

8pt text (very small)

10pt text (small)

12pt text (standard body)

14pt text (slightly larger)

18pt text (subheading size)

24pt text (heading size)

3. Text Colors

Red text | Blue text | Green text | Orange text

Purple text | Teal text | Brown text | Gray text

Yellow highlight | Green highlight | Cyan highlight

4. Styles from styles.xml

The following paragraphs use styles defined in the styles section above:

This paragraph uses the 'CustomHighlight' style with yellow background.

This sentence has **red bold character style** and *blue italic character style* applied from styles.xml.

5. Lists

5.1 Bullet List

- First bullet point – demonstrating proper bullet formatting
- Second bullet point – uses LevelFormat.BULLET constant
- Third bullet point – not unicode symbols

5.2 Numbered List

1. First numbered item – uses decimal numbering
1. Second numbered item – continues sequence
1. Third numbered item – proper Word numbering

6. Tables

Below is a table demonstrating borders, shading, and cell formatting:

Feature	Description	Example
Bold	Makes text bold	Bold text
Italic	Makes text italic	<i>Italic text</i>
Color	Changes text color	Colored text

7. Text Alignment

This paragraph is left aligned (default).

This paragraph is center-aligned.

This paragraph is right-aligned.

This paragraph is justified. When there is enough text in a justified paragraph, it will stretch to fill the entire width of the page from left to right margin, creating clean edges on both sides.

Summary

This document demonstrates all major DOCX features:

- Inline formatting: bold, italic, underline, strikethrough, highlights
- Multiple font types: Arial, Times New Roman, Calibri, Georgia, Verdana, Courier New
- Font sizes: from 8pt to 24pt
- Text colors and highlights
- Style-based formatting using styles.xml references
- Bullet and numbered lists
- Tables with borders, shading, and formatted cells
- Text alignment options
