[Comprehensive Workforce Plan Template](#)

Introduction

Welcome and thank you for accessing the Comprehensive Workforce Plan Template. This template is designed to outline key areas, questions, and resources that will help your health center as you develop a comprehensive workforce plan that addresses your workforce needs and plans for teaching and training students.

A comprehensive workforce plan is not a static document and needs continuous revision as the landscape of the health center workforce rapidly changes. For this reason, the template will evolve.

This template is divided into categories that outline essential components to consider when developing your health center's comprehensive workforce plan. Each area contains important questions and components to consider when assessing your health center's workforce needs, and where applicable, links to pertinent resources.

We welcome each of your health centers to use, develop, adapt, and apply the Comprehensive Workforce Plan Template to meet the needs of your health center workforce and student training needs.

If you have any questions or resources to share, please feel free to reach out to Emma Kelley, Recruitment and Workforce Development Specialist, at ekelley@iphca.org.

Current State Analysis (continued)

Metrics

Turnover

Describe how your organization monitors and assesses turnover. **Assess the cost of turnover.**

Commented [EK3]: [Turnover Calculator Tool](#)

Recent Employee Satisfaction Results

State the results of your most recent employee satisfaction survey. State your organization's goal results when conducting these surveys.

Salary Benchmarking

List what sources your organization uses to gather salary information. State how often you review salaries internally.

Commented [EK4]: IPHCA Compensation and Benefits Survey (Available upon request. Please contact Ashley Colwell, acolwell@iphca.org).

Workforce Challenges/Barriers to Success

Describe what challenges your organization encounters when recruiting and retaining employees (e.g. local/national market trends, retirement rates, compensation, etc.).

Current DEI Practices and Policies

Describe the demographics of your staff. List the strategies your organization employs to ensure diversity, equity, and inclusion in your hiring practices and workplace culture.

Retention Strategy

Retention Activities

1. Circumstances of Use:

Topic	Current Practice	Gaps/ Opportunities	Needs	Goals
Staff recognition				
How staff satisfaction is measured				
How staff performance is measured and communicatedThis Standard Operating Procedure (SOP) outlines requirements to be considered by an authorized user of the XXXXnm, XXXXnm, & XXXXnm lasers as well as describes the normal operation of the laser and any hazards that may be encountered during normal operation. Finally, the SOP explains				

how to minimize any hazards and how to respond in an emergency situation. This document is to be reviewed one year from the date of approval or as conditions warrant, whichever is the shorter time period.					
Financial incentives (bonuses, productivity incentives, etc.					
Non-traditional incentives (staff volunteer days, remote options, free food, etc.)					
Employee wellness and burnout prevention					
Exit evaluation (interview and/or survey)					
Professional development opportunities					
Advancement opportunities/ career paths					

Retention Strategy (continued)

Provider-Specific Retention Activities

2. Potential Hazards:

Topic		Current Practice	Gaps/ Opportunities	Needs	Goals
Provider community integration					
Spouse and family community integration					
Preceptorship scholarship, and/or research opportunities					
A. Laser Hazards: The XXXXnm lasers are Class 3B lasers. Another XXXXXnm laser is a Class 4 laser. Severe eye damage (including blindness) and skin damage can result from direct beam and specular reflections. Eye damage can also result from diffuse reflections.					
B. Electrical Hazards: electrical shock or					

electrocution could result from direct contact with high voltage. Be careful to make sure no liquids are on your gloves or hands when plugging laser power cords into power supply. C. Chemical: Keep flammable solvents out of beam path.					
Team-based care					
Other					

[Employee Satisfaction/Engagement Surveys](#)

[Describe your policy, timeline, and process for disseminating results. You can include the survey your organization uses in an Appendix.](#)

Retention Strategy (continued)

Burnout Prevention and Employee Wellness

Use the chart below to assess and describe the policies and practices that your organization employs to prevent burnout and improve employee wellness. List your opportunities for improvement and what you will need to make these improvements. Finally, list your goals/describe your goal state.

3. ~~Work Practice Controls:~~

<u>Policy/Practice</u>	<u>Current Practice</u>	<u>Gaps/ Opportunities</u>	<u>Needs</u>	<u>Goals</u>
<u>Policy/Practice #1</u> Lasers 1.Only authorized personnel will operate lasers. 2.The laboratory doors will be closed when the laser is operating. 3.During alignments, the laboratory doors will be closed and a sign posted stating "Laser alignment in progress. Do not enter. Eye protection required." 4.Unauthorized personnel will be only allowed entry to the laboratory during laser operation with the supervision of an authorized user under the terms specified by the PI.				

5. Laser _____ protective eyewear of OD+ ~~XX~~ for working with ~~XXXX~~ nm, ~~XXX~~ nm, ~~XXX~~ nm are available (specify area where eyewear is available) for every user.

6. Laser _____ protective eyewear must always be worn when the laser is in operation.

7. No _____ filters or other optics _____ will provide suitable protection; use only _____ laser _____ safety protective eyewear with optical _____ density necessary for the output power in use.

PLEASE NOTE: Laser protective eyewear is specific _____ for _____ the wavelength and power output _____ and _____ proper selection is important.

8. Specular and diffuse reflections _____ will _____ be controlled _____ using apertures, _____ beam housings and enclosures, and optics. All _____ of these control methods _____ must _____ be _____ in place during normal operation.

9.Laser alignment must be performed only by following the steps outlined in the alignment procedure supplement or alignment section. 10.Perform physical surveys to determine if there are stray beams (specular or diffuse) emanating from each laser and its optics, and then document the beam surveys noting the location of stray beams and the measures taken to control them. 11.Methods of documentation of survey may be recorded. 12.If the beam path must be changed significantly by relocating the laser or optics, all users must be notified of the change. 13.The same precautions that are taken for safe operation of the laser must also be followed when adjusting any of the optics in use with the apparatus. 14.When a new principal researcher/experimenter takes over use of the laser system, the new				
---	--	--	--	--

user must conduct a survey for unwanted stray or diffuse beams. B. Electrical 1.Enclosures for protection against the high voltages of the laser power supply or laser head may only be removed after the power supply has been unplugged from the outlets and after following the safety procedures outlined in the safety and operations manual provided by the manufacturer. 2.Only qualified personnel may perform all internal maintenance to the laser and more than one user must be present when performing said maintenance. 3.Every portion of the electrical system, including the printed circuit cards, should be assumed to be at dangerous voltage level.				
--	--	--	--	--

C. Chemical

1. Always check that any flammable solvent placed under the laser beam does not ignite or combust by referencing the flash point of the chemical and the temperature increase of the chemical under laser exposure.

Policy/Practice #2

Policy/Practice #3

Recruitment Strategy

Use the chart below to assess and describe the components of your organization’s recruitment strategy. List your opportunities for improvement and what you will need to make these improvements. Finally, list your goals/describe your goal state.

Recruitment Activities

Commented [EK5]: Recruitment and Workforce Development Resources, see “Recruitment and Retention”.

Personal protective equipment (PPE):

Topic	Current Practice	Gaps/ Opportunities	Needs	Goals
Job opportunity promotion (avenues used)				
Job description structure and components OD+  laser protective eyewear specific to the wavelength and power of the laser. -Ultraviolet opaque clothing when working around high intensity UV lasers. -Long pants and closed toe shoes.				

Commented [EK6]: Try to set SMART goals.
S Specific: What exactly are we going to do?
M Measurable: How will we know we have achieved it?
A Agreed upon: Do we have everyone engaged to achieve it?
R Realistic: Is our objective reasonable with the available resources and time?
T Time-bound: What is the time frame for accomplishment?

Commented [EK7]: Try to set SMART goals.

Community presence				
Candidate review process				
Interview process				

Provider-Specific Recruitment Activities

5. Experimental Procedure:

<u>Topic</u>	<u>Current Practice</u>	<u>Gaps/ Opportunities</u>	<u>Needs</u>	<u>Goals</u>
Student Loan Repayment and Promotion Normal Operation A. Inspect all electrical and water connections for damage and connectivity. B. Complete the “check-in”. The checklist serves to confirm that all basic systems are operating within expected parameters and that basic safety mechanisms are in place. C. The laser run log is a set of forms adjacent to the Standard Operating Procedure experimental set-up and is used to ascertain the current state of the laser.				

Commented [EK8]: [Recruitment and Workforce Development Resources](#), see “Scholarships, Loan Repayment, and Funding Opportunities”.

- D. Log all use and add individual notes as necessary.
- E. Also, replacement of optics and other routine maintenance should be noted in the log.
- F. Once the checklist is complete, the laser may be turned on.
- G. Turn laser system on.

System Alignment

- A. See the attached alignment procedure supplement/alignment section for details.

System Shutdown

- A. After a run is finished, complete the log entry and the checkout portion of the checklist in.

Emergency Procedures

- A. Laser accidents: Follow the steps outlined in the Procedure for Laser Accidents.
- B. Power outage: If there is a power outage,

turn off the laser to avoid a hazardous situation when power is restored				
J1 Visa Recruitment				
Sign-On Bonus/Retention Bonus				

Commented [EK9]: [Recruitment and Workforce Development Resources](#), see “Visa Resources”.

Commented [EK10]: [Recruitment and Workforce Development Resources](#), see “Visa Resources”.

Strategic Workforce Plan (Pathway Building Activities)

Strategic Workforce Plan Summary Statement

[Health center name]’s strategic workforce plan involves partnerships with schools and programs that position our health center to create pathways for a highly qualified, mission-driven, and diverse workforce to join our talent pool.

Use the table below to outline the current health professions education and training (HP-ET) programs and partnerships your organization uses to develop its pathways to employment.

The columns describe students your organization trains. The rows describe the profession for which the students are training.

Current Health Professions Education and Training (HP-ET) – In-House and Partnerships

6. Waste Disposal:

<u>Discipline/Waste Policies & Programs</u>	<u>K-12 Students</u>	<u>Undergraduate (Including Community College and Technical/ Vocational Programs/ Apprenticeships)</u>	<u>Advanced Degree (Resident Physicians, APRN, Dentists, etc.)</u>
<u>Medical Students</u>			
<u>Physician Assistant Students</u>			
<u>APRN Students</u>			
<u>Dental (DDS/DMD, RDH, DA) Students</u>			
<u>Behavioral Health (BSW, CADAC, MSW, LCSW, LCPC, Psychology) Students</u>			

Commented [EK11]: Include this summary statement to remain compliant with HRSA’s requirement that your comprehensive workforce plan include health professions education and training.

Pharmacy Students			
Nursing (RN, LPN, etc.) Students			
Allied Health Students			
Non-Clinical Students			
Other			

Strategic Workforce Plan (continued)

Use the table below to outline health professions education and training (HP-ET) programs and partnerships your organization plans to develop over the next 1-3 years.

Future Planned/Goal Health Professions Education and Training (HP-ET) – In-House and Partnerships

7. ~~Exposures/Unintended contact:~~

<u>Discipline</u>	<u>K-12 Students</u>	<u>Undergraduate (Including Community College and Technical/ Vocational Programs/ Apprenticeships)</u>	<u>Advanced Degree (Resident Physicians, APRN, Dentists, etc.)</u>
<u>Medical Students</u>			
<u>Physician Assistant Students</u>			
<u>APRN Students</u>			
<u>Dental (DDS/DMD, RDH, DA) Students</u>			
<u>Behavioral Health (BSW, CADAC, MSW, LCSW, LCPC, Psychology) Students</u> <u>Contact</u> <u>Environmental</u> <u>Health and Safety</u> <u>at (407) 823-6333</u> <u>for medical advice</u> <u>on occupational</u> <u>chemical</u> <u>exposures. For an</u> <u>actual chemical</u>			

Commented [EK12]: HRSA will track which health centers add HP-ET planning in their comprehensive workforce plans.

Commented [EK13]: [Recruitment and Workforce Development Resources](#), see “Health Workforce Training”.

exposure, complete the work-related injury or illness report found at: EH&S, Workplace Safety, Accident Investigation Form.			
Pharmacy Students			
Nursing (RN, LPN, etc.) Students			
Allied Health Students			
Non-Clinical Students			
Other Students			

Succession Planning

8. Spill Procedure:

Staff						Staff Age Range	Over Age 50	All Ages			
						Planned Retirement	Major Leave Plans	Expected Changes in FTE Follow procedures outlined in Laboratory Safety Manual.			
Employee Name, Chief Executive Officer											
Employee Name, Title											
Employee Name, Title											

Commented [EK14]: CEO Succession Planning: A Toolkit for Health Center Boards

Commented [EK15]: CEO Succession Planning: A Toolkit for Health Center Boards

9. Training of personnel:

- A. Authorized Personnel:** The XXXXnm lasers may be operated only by authorized personnel who are fully cognizant of all safety issues involved in the operation of such a device. These personnel are to ensure that the laser is only operated in the manner laid out in this document.
- B. To become an authorized user, one must:**
1. Successfully complete EHS 309 online laser safety training.
 2. Obtain a baseline ophthalmologic examination (considered optional by ANSI Z136.1)
 3. Read and fully understand the SOP
 4. Receive training on the XXXXnm lasers by an authorized user.
 5. Sign and date the authorized user sheet to affirm that the above steps have been completed.
- C. Unauthorized personnel:** No unauthorized personnel may enter during laser operation unless accompanied by an authorized user. All visitors must be briefed on

~~proper safety protocol and must wear appropriate laser protective eyewear located on the premises.~~

10. Training of personnel:

Documentation of Training *(signature of all users is required)*

Training records must be in lab for SOP. Training record must state the SOP that the person was trained on and must contain the phrase "I have read and understand the content of this SOP", followed by the person's name, signature and date of training.

"I Have Read and Understand the Content of this SOP."
