

file_197196.docx

Images

Images can be of three main types. Inline images are images that are part of the normal text flow, like this image of a green dot ●. Inline images do not cause breaks in the text and are usually small in size. The next category of image is a floating image, one that “floats ” on the page and is surrounded by text. Word supports more types of floating images than are possible with current ebook technology, so the conversion maps floating images to simple left and right floats, as you can see with the left and right arrow images on the sides of this paragraph.

The final type of image is a “block” image, one that becomes a paragraph on its own and has no text on either side. Below is a centered green dot.

Centered images like this are useful for large pictures that should be a focus of attention.

Generally, it is not possible to translate the exact positioning of images from a Word document to an ebook. That is because in Word, image positioning is specified in absolute units from the page boundaries. There is no analogous technology in ebooks, so the conversion will usually end up placing the image either centered or floating close to the point in the text where it was *inserted*, not necessarily where it appears on the page in Word.

- 1) ~~Video provides a powerful way to help you prove your point.~~
 - a) ~~When you click Online Video, you can paste in the embed code for the video you want to add.~~
 - b) ~~You can also type a keyword to search online for the video that best fits your document.~~
- 2) ~~To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other.~~
 - a) ~~For example, you can add a matching cover page, header, and sidebar.~~
 - b) ~~Click Insert and then choose the elements you want from the different galleries.~~
 - c) ~~Themes and styles also help keep your document coordinated.~~
 - i) ~~When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme.~~
- 3) ~~When you apply styles, your headings change to match the new theme.~~
 - a) ~~Save time in Word with new buttons that show up where you need them.~~

~~Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document.~~

~~To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries.~~

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme.

Heading1

Video provides a powerful way to help you prove your point. When you click Online Video, you can paste in the embed code for the video you want to add. You can also type a keyword to search online for the video that best fits your document.

To make your document look professionally produced, Word provides header, footer, cover page, and text box designs that complement each other. For example, you can add a matching cover page, header, and sidebar. Click Insert and then choose the elements you want from the different galleries.

Heading 2

Themes and styles also help keep your document coordinated. When you click Design and choose a new Theme, the pictures, charts, and SmartArt graphics change to match your new theme. When you apply styles, your headings change to match the new theme.

Save time in Word with new buttons that show up where you need them. To change the way a picture fits in your document, click it and a button for layout options appears next to it. When you work on a table, click where you want to add a row or a column, and then click the plus sign.

Reading is easier, too, in the new Reading view. You can collapse parts of the document and focus on the text you want. If you need to stop reading before you reach the end, Word remembers where you left off—even on another device.
